**Supplementary material**

Table S1. List of Corsican islands and islets. Selection criterions: at least 2 m far from the coast, separated by a channel at least 50 cm deep and hosting vascular plants. With following rows (left to right): names of the islands; geographical coordinates; area (m<sup>2</sup>); altitude in m; kml = localisation in Google earth; No invest = islands non investigated for herpetofauna; E.e = *Euleptes europaea*; P. t = *Podarcis tiliguerta*; T. m = *Tarentola mauritanica*; H. v = *Hierophis viridiflavus*.
