

2021 Virtual Summit Series

Bringing stakeholders together to enhance
transparency in research

Friday February 26

Research integrity: Developments across the Atlantic

Tuesday March 16

Open access policy: Developments across the globe

Friday March 26

Acceleration of research; implications for transparency

After a year of zoom overload we're shaking things up in 2021, the fourth year of CBMRT's highly successful global Summit series. Instead of running a full day of presentations, we'll be hosting three short sessions - deliberately brief (but content rich) to allow ample time for discussion. Once again, you're invited to join a diverse group of participants from across the spectrum of industry, academia, policy and research funding - and be fully engaged by our outstanding speakers:

- **Dr. Michael Lauer**, Deputy Director Extramural Research, NIH
- **Prof. Johan Rooryck**, Executive Director cOAlition S
- **Dr. Ida Sim**, Director UCSF Informatics & Research Innovation
- **Dr. Sandra Petty**, CEO CBMRT
- **Dr. John Inglis**, Co-founder medRxiv & bioRxiv
- **Prof. Ana Marusic**, Leader SOPs4RI
- **Prof. Ginny Barbour**, Executive Director AOASG
- **Ms. Deborah Dixon**, Global Editorial Director OUP

Early registration
helps everyone get
excited and makes
for a better event
for everyone:

If you value
transparency in science
and want to keep up
the energy in this
space, please **REGISTER
NOW** (full Summit
