Environmental Data Initiative

EDI is:

- A feature-rich, durable, extensible and secure data repository containing over 7000 unique, high quality datasets
- A team of data curation specialists
- Funded by NSF

EDI offers FREE expert data management support to:

- Ecologists
- Environmental Scientists
- Geoscientists

## EDI enhances data management skills throughout the community by:

- In-person and online training
- Interactive webinars
- A fellowship program in which students complete an 8-week information management project at a sponsoring lab or research site

Growth of the EDI Repository

Summer 2018 EDI Fellows and Instructors

EDI produces information management tools to help scientists create high quality data and metadata:

- ezEML, a user-friendly web-based editor to generate EML
- EMLAssemblyLine, an R package to generate EML
- taxonomyCleanr, an R package to link taxa with IDs from a taxonomic authority

How can you get started working with EDI to deposit data?

- Contact us at info@environmentaldatainitiative.org. You will get a response from a data curation specialist within 48 hours.
- Check out our easy-to-follow "Five Phases of Data Publishing" on the EDI website
