Figure S1. Gating strategy for BMDM FACS analysis assessed by FlowJo software. (A) FSC-SCC > **(B)** Single cells > **(C)** Single cells > **(D)** Live/ Dead Aqua stain > **(E)** F4/80+; CD11b+. BMDM from Balb/c and C57BL6 mice were collected and stained with aquadead (life/dead discrimination), anti-F480 (PE) and anti-CD11b (APC) mAbs for purity determination and different techniques.
