Supplementary Material

Figure S1 displays daily average values of the hourly meteorological data displayed in Figure 3. Figure S2 displays calculated daily albedo between May 2016 and May 2018.
Figure S1. Daily meteorological data measured by the automatic weather station between May 2016 and June 2018. (a) Daily sum of precipitation from the Total Precipitation Gauge, (b) average air temperature, (c) surface temperature (d) relative humidity, (e) wind speed and direction, (f) barometric pressure, (g) net shortwave radiation (h) net longwave radiation.
Figure S2. Daily albedo calculated between May 2016 and June 2018.
