Figure S5. Morphology of D-type motor neurons.

Fluorescent images of D-type motor neurons in wild-type, *sqv-3*(*n2842*), *svh-11*(*gk819958*) and *sqv-5*(*n3611*) animals carrying *Punc-25::gfp* are shown. D neurons are visualized by GFP under the control of the *unc-25* promoter. Scale bar = 50 μ m.
