

Supplemental data

Number	Time of residual disease after EBT (yrs)	Treatment of residual disease	Outcome
1	0.3	Lobectomy	Alive without disease
2	1.0	Lobectomy	Alive without disease
3	1.6	Lobectomy	Alive without disease
4	2.0	EBT	Alive without disease

Table 4a: residual disease after EBT (≤ 2 years)

Number	Time of recurrence after EBT (yrs)	Treatment of recurrence	Outcome
1	3.7	Lobectomy	Alive without disease
2	5.2	No treatment [∞]	Alive with disease
3	8.6	Pneumonectomy	Alive without disease
4	9.5	Pneumonectomy	Alive without disease
5	11.9	EBT*	Alive with disease
6	16.5	Bronchus sleeve resection	Alive without disease

Table 4b: recurrences after EBT (>2 years), [∞]refused EBT and surgery, *refused surgery.

Deaths during follow up	Interval death after first EBT (months)	Cause
1	4	<i>Dead other cause</i>
2	26	<i>Dead other cause</i>
3	62	<i>Dead other cause</i>
4	83	<i>Dead other cause</i>
5	120	<i>Dead other cause</i>
6	171	<i>Dead other cause</i>
7	223	<i>Dead other cause</i>
8	unknown	<i>Dead other cause</i>
Mean survival	207 (SD 181-232)	

Table 5a. Deaths during follow up in patients with successful EBT (n=61) .

Deaths during follow up	Interval death after first EBT (months)	Cause
1	12	<i>Postoperative complications</i>
2	24	<i>Dead other cause</i>
3	60	<i>Dead other cause</i>
4	81	<i>Metastatic disease</i>
5	unknown	<i>Metastatic disease</i>
Mean survival	251 (SD 222-281)	

Table 5b. Deaths during follow up in patients with unsuccessful EBT and surgery (n=64).
