

Supplementary Figure 1. Comparisons between type 1 group and type 2 group in vessel area (%) and Junction density (/mm) from baseline. (a, b) The eyes in the type 1 group contained only type 1 lesions without type 2 lesions, and the eyes in type 2 group contained type 2 lesions with or without type 1 lesions. Note that the change ration of vessels area of the type 2 group significantly decreased compared to that of the type 1 group at 1 and 2 months. Data are presented as mean \pm standard deviation. * $p < 0.05$.
