

Con

Day10

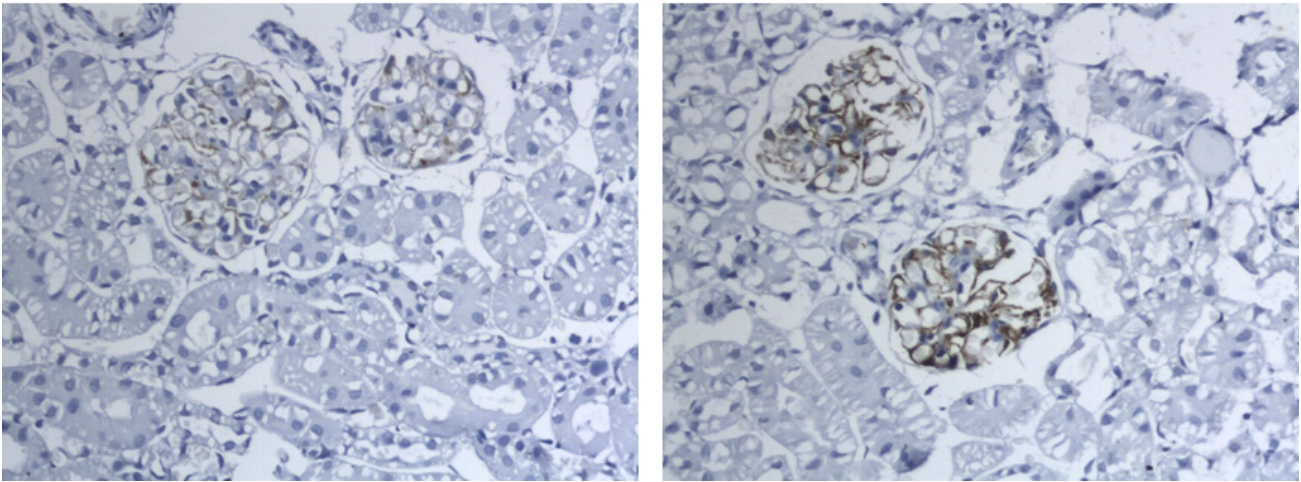

Figure S1. Immunohistochemistry of nestin in the kidney sections of the control and PAN-treated rats. Magnification: ×100.

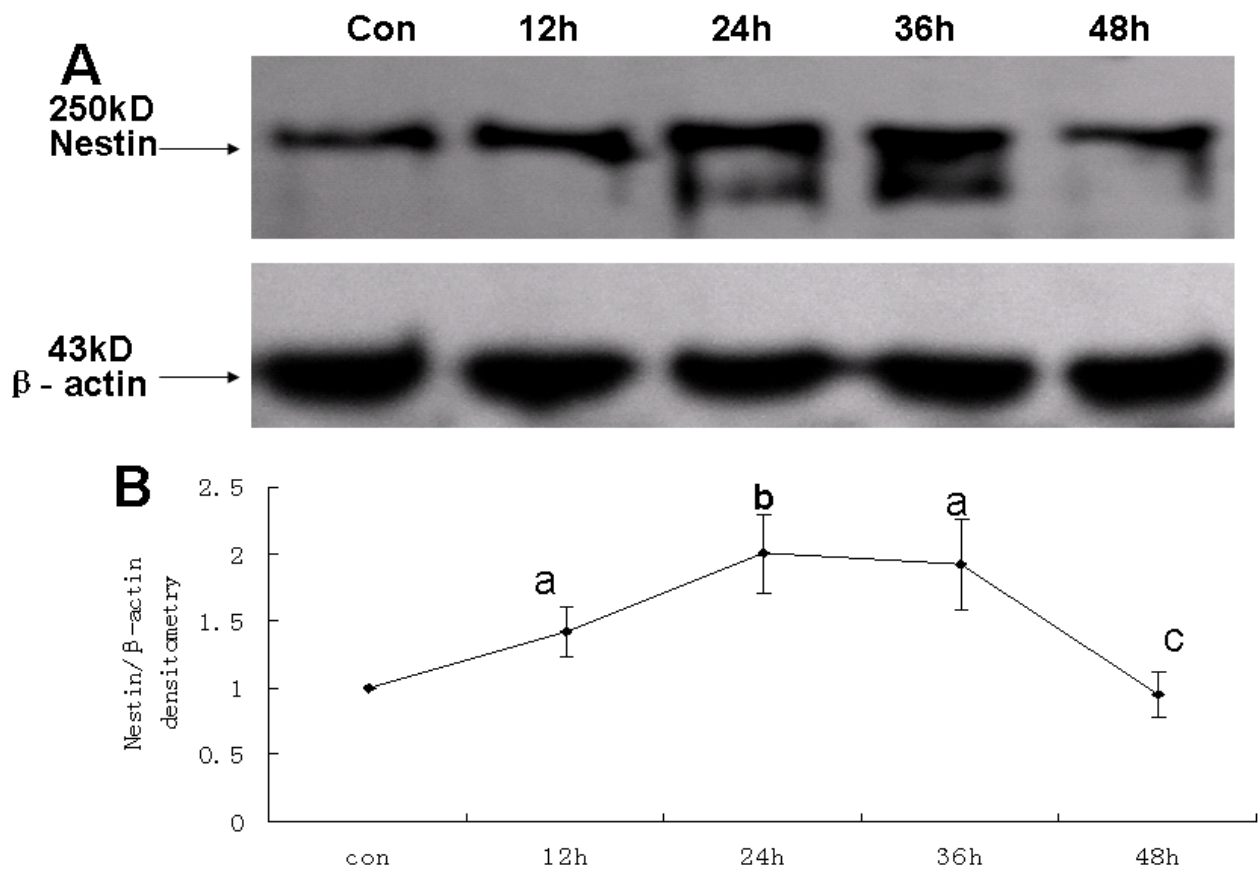

Figure S2. Immunoblot of nestin expression in cultured podocytes after PAN induction. ^a $P < 0.05$ vs Con; ^b $P < 0.05$ vs 12h; ^c $P < 0.05$ vs 36h. (N=3).

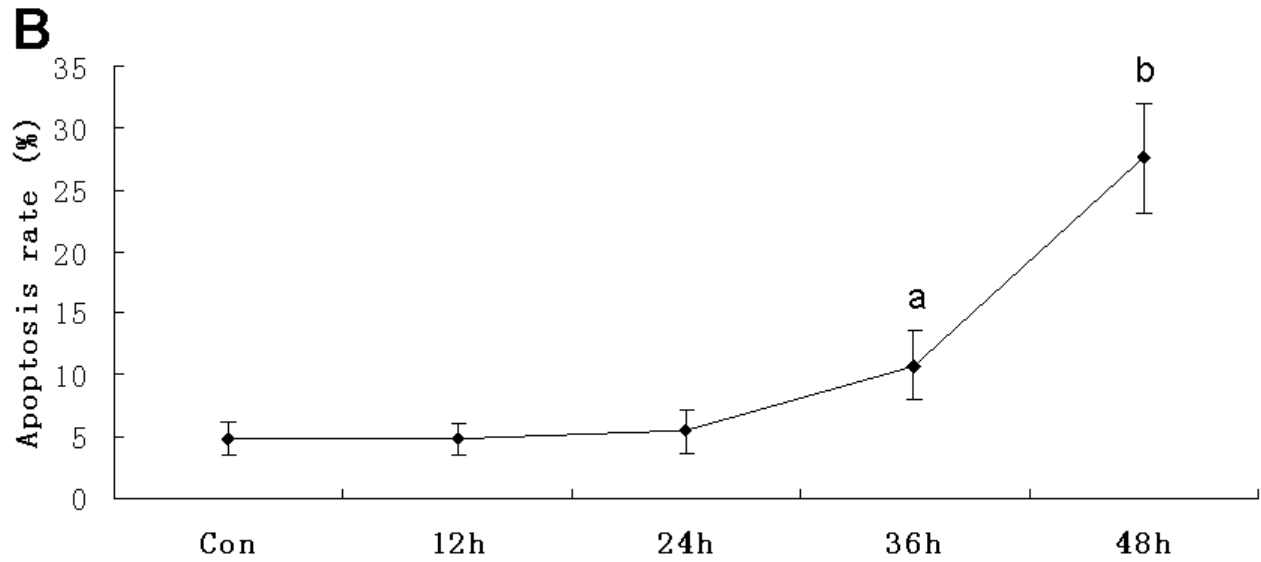

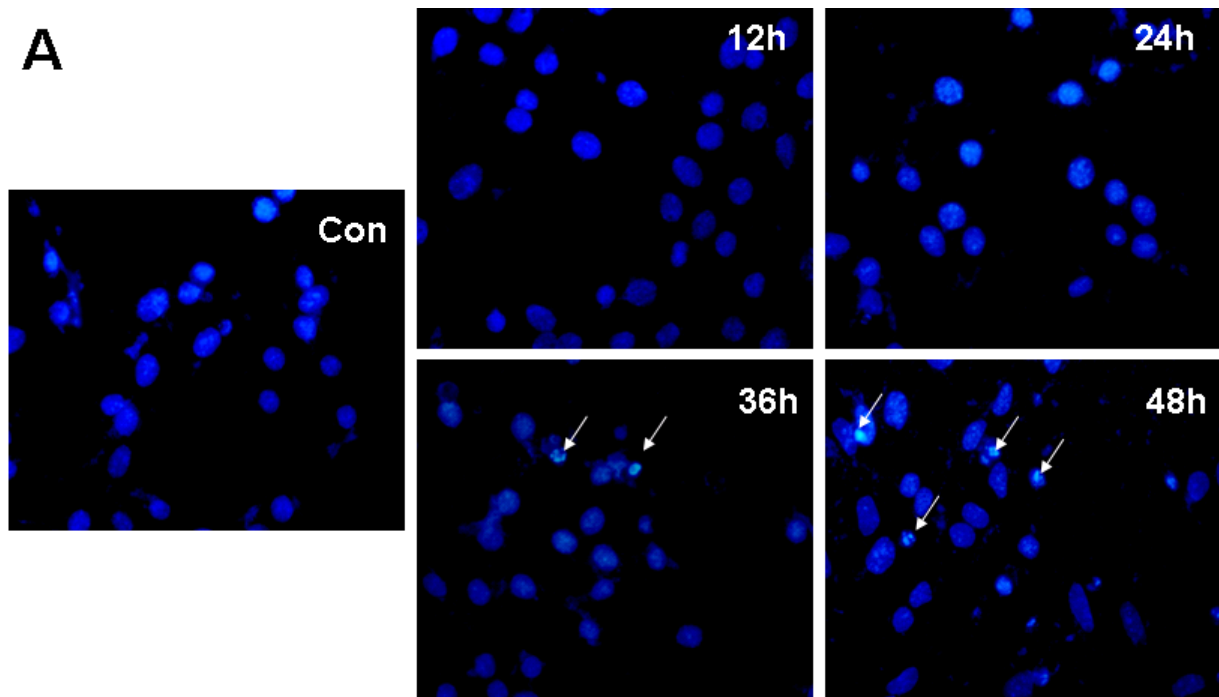

Figure S3. Apoptosis rate detected by Hoechst stain analysis in cultured podocytes after PAN induction.. ^a $P < 0.05$ vs Con. ^b $P < 0.05$ vs 36h. (N=3). Arrows indicate apoptotic cells. Magnification: $\times 400$.
