

Materials and Methods

Patients' images and data were treated according to the local Ethics Committee approval (protocol No. 1338/CE, April 29, 2009).

Noncontact polarized light dermoscopy (Dermlite HR®; 3Gen Inc., San Juan Capistrano, CA, USA) and confocal microscopy (Vivascope 1500® and Vivascope 3000®; MAVIG GmbH, Munich, Germany) were employed for the imaging.
