

Erratum

In the article 'Skin Cancer Concerns and Genetic Risk Information-Seeking in Primary Care' by Hay et al. (Public Health Genomics DOI: 10.1159/000330403) there is an inaccuracy in table 2.

In table 2, descriptive statistics (n, %) for marital status and parenthood status were reversed. Accordingly, 76% of Caucasians and 54% of African-Americans were married or in a couple; 70% of Caucasians and 79% of African-Americans had children.
