

## Erratum

The authors of the article entitled 'Helix B surface peptide protects against acute myocardial ischemia-reperfusion injury via the RISK and SAFE pathways in a mouse model' [Cardiology 2016;134:109–117, DOI: 10.1159/000443680] wish to publish the following correction: on page 116, figure 6b, the SOD activity unit should be U/mg; see corrected figure 6 below:

**Fig. 6.** HBSP ameliorates oxidative stress after MIRI. HBSP significantly decreased the MDA content (a) and enhanced the SOD (b). \*  $p < 0.05$  versus the sham group; #  $p < 0.05$  versus the MIRI group; §  $p < 0.05$  versus the HBSP group.
