1 About the dementia diagnosis test

This test measures a wide range of indicators that together can give a reliable indication about time of onset of dementia. We measure various biomarkers that can give a diagnosis with 95% accuracy. Please consult Dr. Lorem Ipsum if you want to know more details about these biomarkers.

2 Your test result: You will develop dementia from the age of 68

Here you have an overview of your individual timeline and how your Dementia is likely to develop. Dr. Lorem Ipsum will discuss this timeline with you in detail and the options you have along the way.

3 What now?

Dr. Lorem Ipsum will be in touch with you on **21.10.33 at 10.15**. Please contact us if you want to change the time for this meeting. It is important that you bring a friend, partner or other individual that can handle care matters for you into the future. *This is a journey that we recommend you do not make alone.* If there is no one that you feel comfortable with to be there for you then we can help you find your care friend from our pool of wonderful volunteers.

We will discuss with you options for your future. The aim is to help you have a high quality of life until your death. How this looks is entirely up to you and we will help you to make the best of it, for you.
