

Additional file 7: Pairwise microsatellite F_{ST} values between all sampling sites. Sampling sites are indicated by the site abbreviations, and letters from A–G indicate GENELAND groups. Colors indicate within-group F_{ST} values. Red and bold F_{ST} values indicate significant values (all). Significance levels were adjusted according to the FDR. Below the diagonal, uncorrected F_{ST} values are shown; above the diagonal, ENA-corrected F_{ST} values are shown.
