

“Single-Occupancy Patient Rooms: A Systematic Review of the Literature since 2006”

Authors: Taylor, E.; Card, A.J.; Piatkowski, M.

Course ID # HERD60

Full Name	AIA # / EDAC #	Email	Phone #

Learning Objective 1: Evaluate the advantages and disadvantages of single-patient rooms for patients, staff, and family and visitors.

Learning Objective 2: Identify what gaps exist across the studies of single-patient rooms.

Learning Objectives 3: Describe variations in outcomes among health care setting types.

Learning Objective 4: Discuss variations in outcomes across countries.

Question 1: The outcomes associated with single-occupancy patient rooms (SPR) suggest there are more often advantages over disadvantages.

- a. True
- b. False

Question 2: Describe how the single-occupancy patient room (SPR) is part of a system and cannot be considered as a stand-alone solution.

Question 3: The strongest body of evidence for single-occupancy patient rooms was presented for which of the following outcomes?

- a. Falls
- b. Restraint Use
- c. Infection Control
- d. Sleep Quality
