

Supplementary figure 1. Kaplan-Meier curves from the Kaplan-Meier plotter

A-D. Kaplan-Meier curves of OS (A and C) and PFS (B and D) in LUSC (A-B) and LUAD (C-D) patients respectively. Both LUAD and LUSC patients were divided into high/low *GOLM1* expression group by using the best cutoff model. Survival data were obtained from the Kaplan-Meier plotter.
