

Supplementary Material

Supplementary Table 1

Characteristics of memory clinic subjects included and excluded in the study (n=1682)

Variables	Included in study (n=1271)	Excluded in study(n=411)	<i>p-value*</i>
Age (years), median (IQR)	74 (12)	73 (20)	0.012
Gender (female), n (%)	717 (56.4)	226 (55)	0.613
Education, (≥ 6 years), n (%)	410 (34.3)	165 (46.7)	<0.001
MMSE, median (IQR)	18 (11)	20 (14)	0.003

Abbreviations: MMSE, Mini–Mental State Examination; IQR, interquartile range
p-value < 0.05 was considered statistically significant

Supplementary Table 2

Characteristics of memory clinic subjects with and without CT scan (n=1271)

Variables	With CT scan data (n=580)	Without CT scan data (n=691)	<i>p-value*</i>
Age (years), median (IQR)	75 (11)	73 (12)	0.020
Gender (female), n (%)	352 (60.7)	365 (52.8)	0.005
Education, (≥ 6 years), n (%)	167 (31.0)	243 (37)	0.030
MMSE, median (IQR)	18 (9)	17 (11)	0.566
Dementia, n (%)	335 (57)	410 (59.3)	0.570

Abbreviations: MMSE, Mini–Mental State Examination; IQR, interquartile range
p-value < 0.05 was considered statistically significant
