

The differences of cells derived from synovium between male and female.
 Values are shown as mean \pm standard deviation.

	male	female	P value
<hr/>			
No.of colonies			
paralabral synovium	7.1 \pm 13.0	10.2 \pm 17.7	.96
cotyloid fossa synovium	27.5 \pm 25.5	34.2 \pm 23.4	.34
<hr/>			
No. of Nucleated cells ($\times 10^5$)/Colony			
paralabral synovium	2.2 \pm 2.0	0.8 \pm 1.0	.21
cotyloid fossa synovium	2.2 \pm 1.1	1.4 \pm 0.6	.10

The differences of cells derived from synovium about age.

	r	P value
<hr/>		
No.of colonies		
paralabrum synovium	.06	.81
cotyloid fossa synovium	- .54	< .05
<hr/>		
No. of Nucleated cells ($\times 10^5$)/Colony		
paralabrum synovium	0.16	0.53
cotyloid fossa synovium	0.09	0.75
