

Supplementary files for the manuscript “Scheduled emergency trauma operation: The green line orthopaedic trauma surgery process of care”

Tables

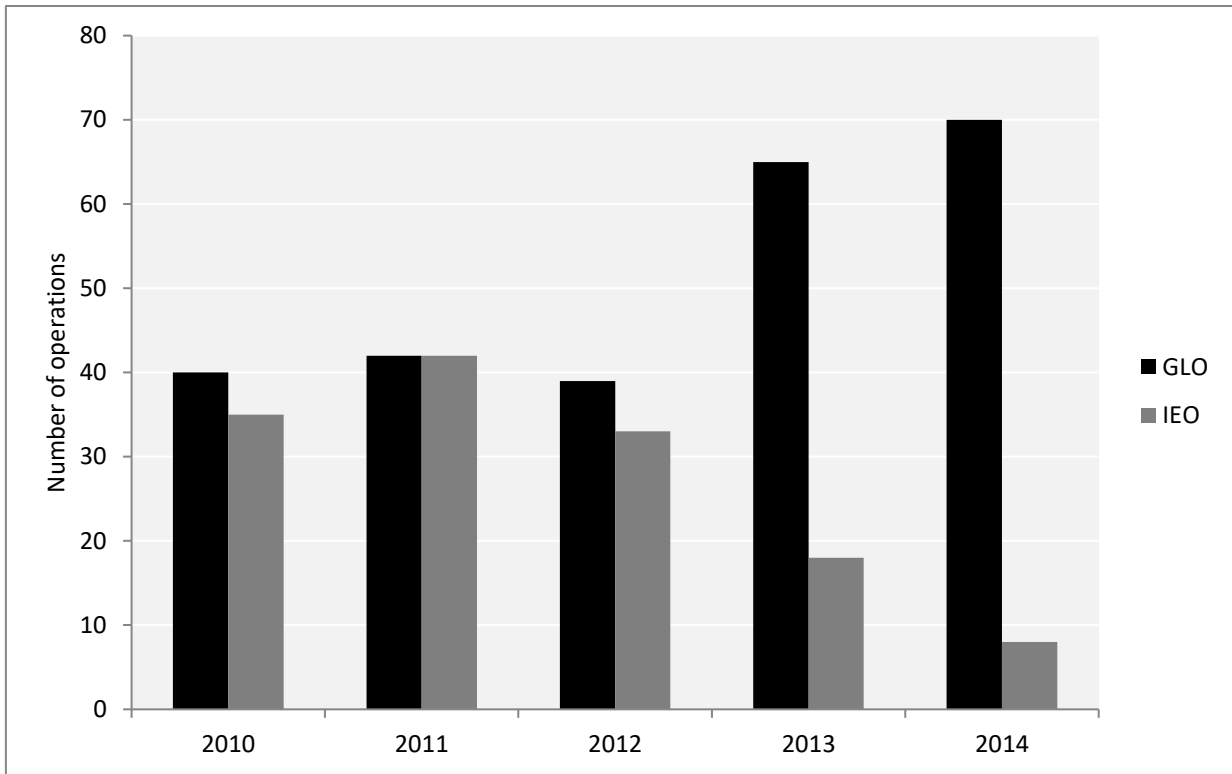

Supplementary table 1. Comparison of demographics and clinical variables between green line process operations (GLPs) and inpatient emergency operations (IEOs)

		GLP	IEO	p-value
Age	Mean (SD)	48 years (19)	61 years (22)	<0.0001
	Less than 65 (%)	1436 (78)	2920 (50)	<0.0001
	65 or older (%)	394 (22)	2913 (50)	
ASA	1 (%)	795 (42)	1188 (19)	<0.0001
	2 (%)	671 (35)	1677 (27)	
	3 (%)	388 (20)	2492 (41)	
	4-5 (%)	43 (2)	751 (12)	

Figures

Supplementary figure 1: Annual number of green line operations (GLPs, black) and inpatient emergency operations (IEOs, grey). Data for year 2015 are only available to April 23rd

Supplementary figure 2. The annual numbers of distal radius fracture (ICD-10 diagnosis code S52.5) operated as green line operation (GLP, black) and inpatient emergency operations (IEO, grey)
