

# Online Appendix

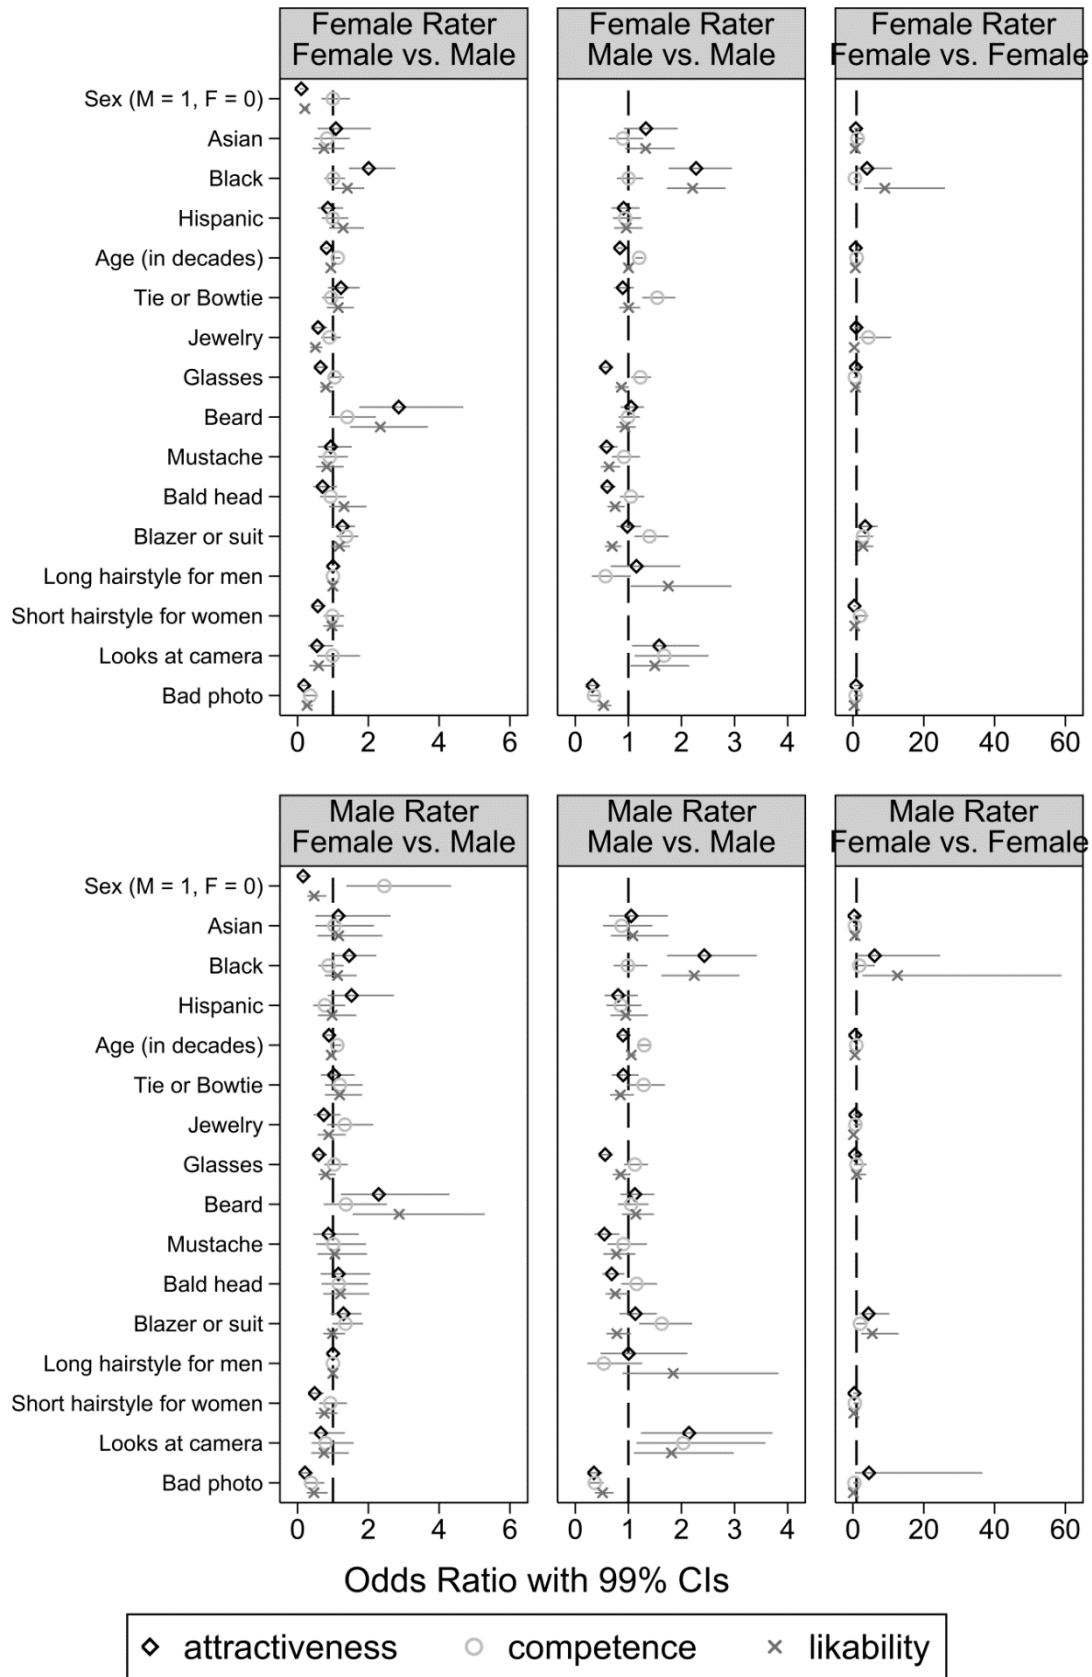

## A1: Descriptive statistics for the raters

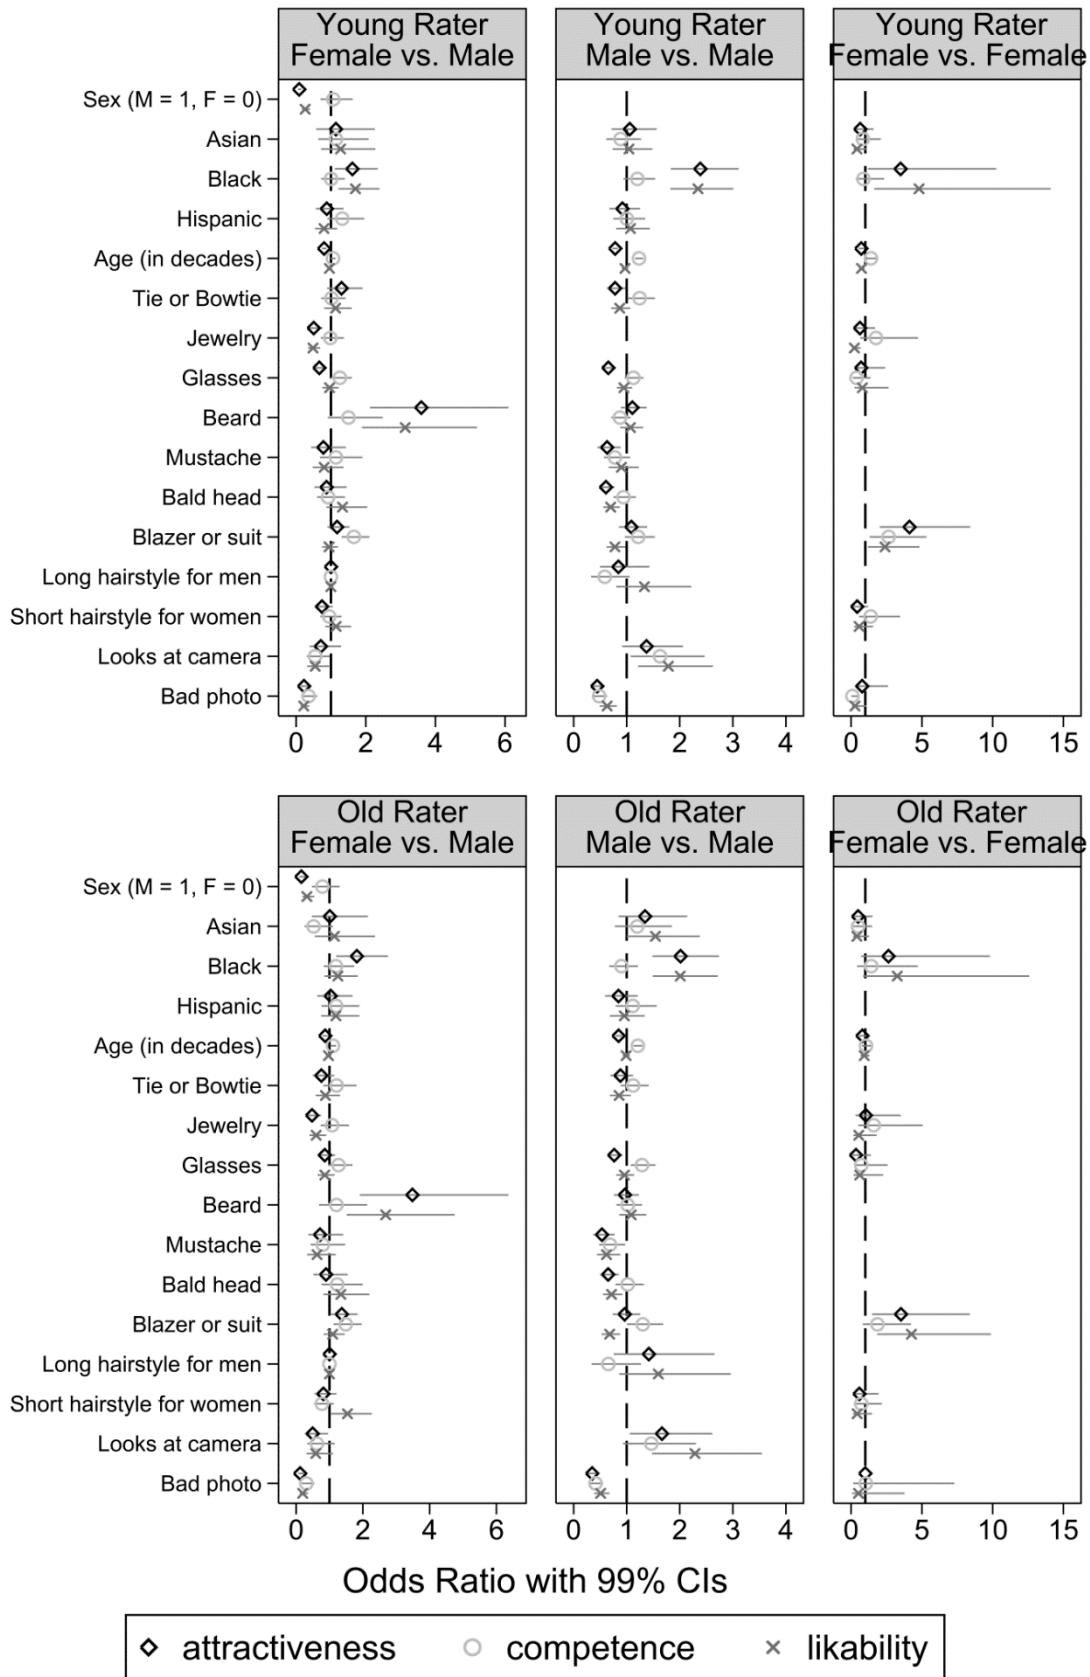

**A2: Determinants of attractiveness, competence and likability (regular background)**

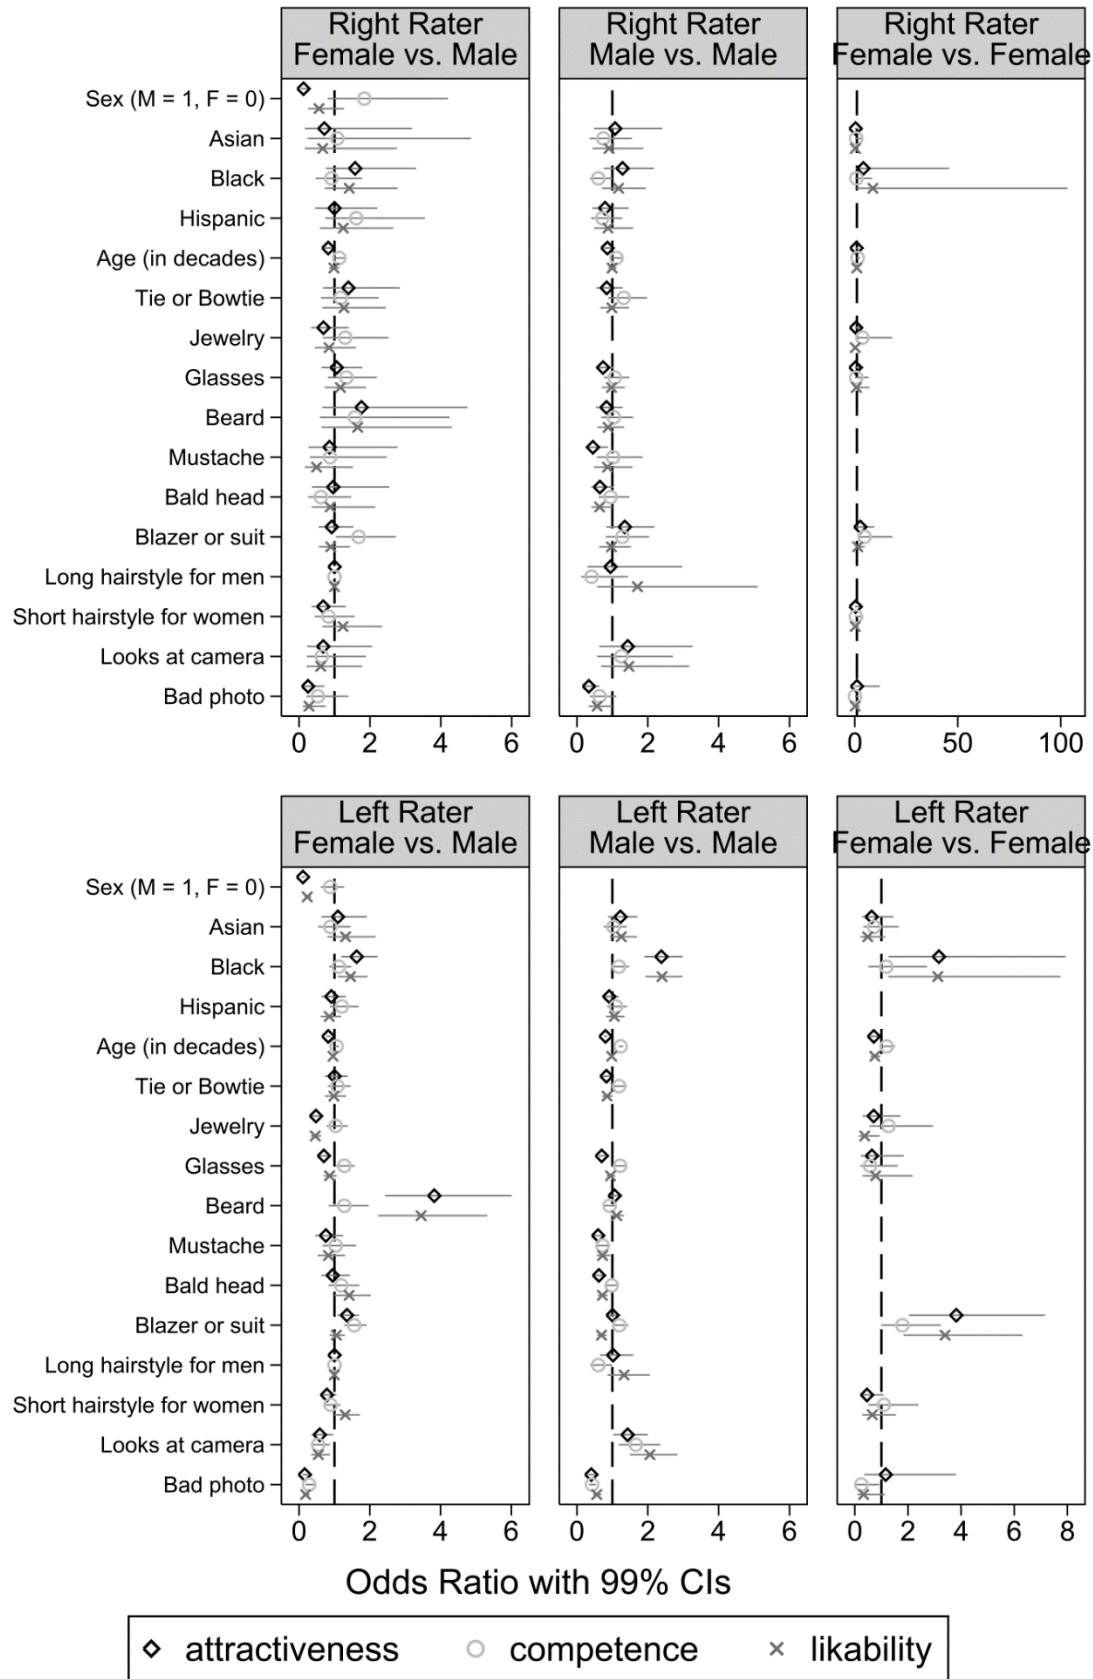

**A3: Determinants of attractiveness, competence and likability (uniform background)**

**A4: Determinants of attractiveness, competence and likability (young vs. old raters)**

**A5: Determinants of attractiveness, competence and likability (left vs. right raters)**

## A6: Ambiguity weighting by latency times

The fastest click of each rater is assigned a weighting factor of 1.0 while the slowest click gets a weight of 0.2. The final weighted proportion of clicks for candidate A in district X computes as follows:

$$p_{A,X} = \frac{\sum_{i=1}^{n_X} (r(A)_{i,X} \cdot w_{i,X})}{\sum_{i=1}^{n_X} (w_{i,X})}$$

with:  $n_X$  = number of ratings in district  $X$

$w_{i,X}$  = weight for rating  $i$  in district  $X$

$r(A)_{i,X}$  = rating  $i$  for candidate  $A$  in district  $X$  (i.e. 0 or 1);

### A7: Variable overview (all variables measure on the level of the electoral district, N = 401)

Variable	operationalization	min / max	mean (sd)
		For dummies: % of cases	
Dependent Variable	Vote share winner – vote share runner up in the House election on November 8	0 / 100	32.142 (18.640)
Attractiveness (picture set1)	Latency weighted mean of clicks for the winning candidate compared to the runner-up. Appearance ratings based on pictures with regular background.	0 / 1	0.529 (0.279)
Competence (picture set1)		0.202 / 1	0.564 (0.202)
Likability (picture set1)		0.050 / 1	0.513 (0.225)
Attractiveness (picture set2)	Latency weighted mean of clicks for the winning candidate compared to the runner-up. Appearance ratings based on pictures with uniform slate-grey background.	0 / 1	0.540 (0.290)
Competence (picture set2)		0 / 1	0.586 (0.208)
Likability (picture set2)		0.023 / 1	0.525 (0.221)
Gender	Four dummies indicating the gender configuration of the race	Winner / Runner up: ♂ / ♂ ♂ / ♀ ♀ / ♂ ♀ / ♀	63.59 17.21 15.46 3.74
Incumbency	Three dummies indicating who of the candidates (if any) was the incumbent	Incumbent = ... Winner 2016: Runner up 2016: Neither winner nor runner up:	85.29% 2.00% 12.72%
Incumbency in years			
Age difference	Age of the winner minus age of the runner up	-35.66 / 49.29	-5.871 (16.071)
Unemployment rate	In %	2.620 / 14.563	6.350 (1.931)
Senior-to-youth-rate	$\frac{\text{Share of seniors (> 60)}}{\text{Share of youth (<25)}}$	0.273 / 1.819	0.662 (0.193)
Males	Male population in %	45.437 / 52.637	49.237 (0.938)
Blacks	Black population in %	0.439 / 66.327	12.167 (13.493)
Hispanics	Hispanic population in %	0.954 / 87.616	17.434 (18.096)
Rental vacancy rate	Percentage of rental houses that is vacant	1.1 / 19.4	5.895 (2.412)
Median household income	In 1000 \$	31.789 / 120.089	58.219 (15.439)
Persons without health insurance	In %	1.931 / 31.403	9.328 (4.427)
Persons with BA or higher	In %	9.1 / 71.5	30.357 (10.218)
District not safe	District has been rated as “not safe” (= leaning, likely or toss up) by at least one of the following predictions on November 7, 2016: Cook Political Report, Daily Kos Elections, the Rothenberg Political Report, and Real Clear Politics.	14.46%	
Toss-up district	District has been rated as “toss-up” by at least one of the following predictions on November 7, 2016: Cook Political Report, Daily Kos Elections, the Rothenberg Political Report, and Real Clear Politics.	6.23%	
District with two candidates from same party	Two candidates from the same party received the most votes.	2.99%	
Absolute margin Trump-Clinton	Absolute difference between the percentage of votes for Donald Trump and Hilary Clinton at the presidential elections 2016; data from the Partisan Voting Index by the Cook Political Report 2017	0 / 87	26.484 (18.439)
Winner Republican	Dummy indicating whether the winner was a Republican	56.36%	
Disbursement difference	$100 \cdot \frac{\text{total disbursement of the winner}}{\text{total disbursement of the winner} + \text{total disbursement of the runner up}}$ Data from the Federal Election Commission, campaign finance data.	15.897 / 100	88.358 (16.785)

## A8: Main models with influential cases excluded

	Model 1	Model 2	Model 3	Model 4
Perceived physical appearance				
Attractiveness	5.439*** (1.957)	5.457*** (1.516)	2.209 (1.733)	
Competence	1.116 (2.153)		1.392 (2.181)	5.822** (2.257)
Likability	-1.746 (1.939)		0.824 (1.956)	
Gender				
Winner: female & Runner up: female	-1.272 (2.067)		-0.810 (1.978)
