

Veterinary Pathology: Supplemental Materials.
 Matias Ferreyra et al. Polioencephalomyelitis in Domestic Swine
 Associated with Porcine Astrovirus type 3.

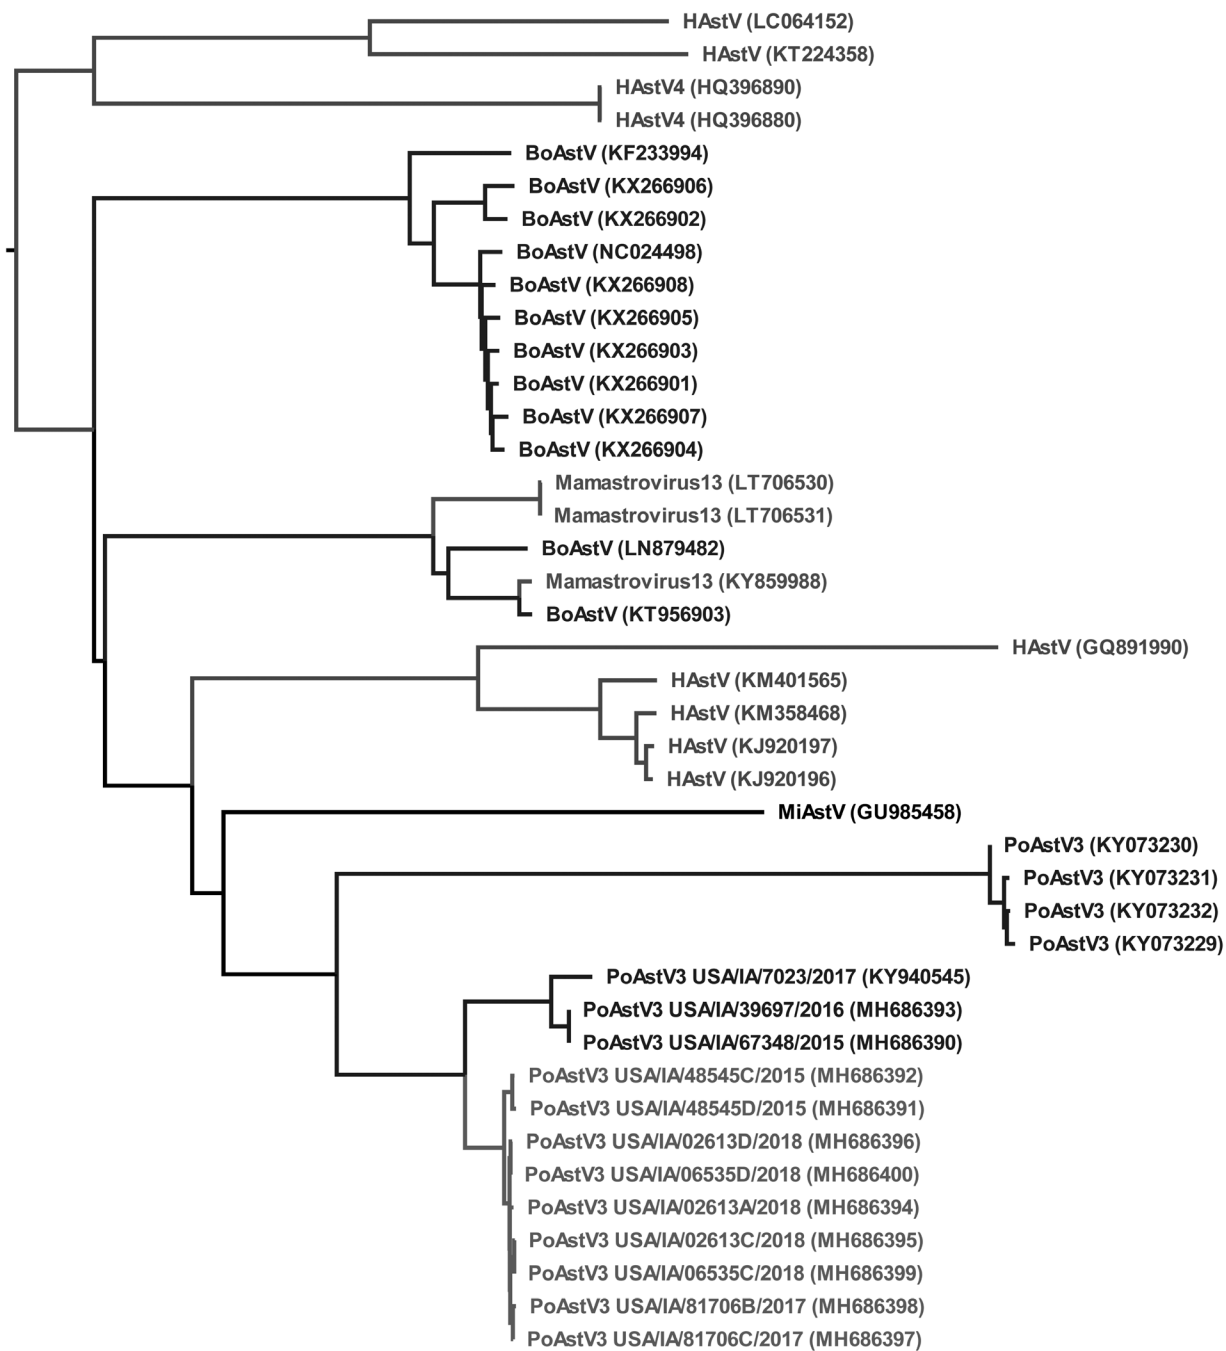

Supplemental Figure 1

0.04

Supplemental Figure 1. Phylogenetic tree illustrating the relationship of strains identified in this study with other PoAstV strains. Neighbor-joining tree including 11 strains identified in this study (MH686390 - MH686400) with 16 other PoAstV strains. Sequences were aligned using MUSCLE v3.8.3114 and neighbor-joining trees were built using ClustalW 2.1. Trees were rendered using Fig-Tree v1.427. All sequences were retrieved from GenBank.

Supplemental Figure 2. Phylogenetic tree illustrating the relationship of strains identified in this study with other neurotropic strains. Neighbor-joining tree including 11 strains identified in this study (MH686390 - MH686400) with 30 strains from other species. Sequences were aligned using MUSCLE v3.8.3114 and neighbor-joining trees were built using ClustalW 2.1. Trees were rendered using FigTree v1.427. All sequences were retrieved from GenBank.
