

Supplemental Table 1. Bivariate Correlations among Study Variables.

Variable	1	2	3	4	5	6	7	8	9	10
1. Mother attachment anxiety										
2. Father attachment anxiety	.36*									
3. Mother ratings of partner responsiveness	-.51*	-.32*								
4. Maternal age	-.14*	-.18*	.01							
5. Adjusted per capita household income	-.17*	-.15*	.09*	.36*						
6. Latina ethnicity ^a	.19*	.19*	-.04	-.15*	-.15*					
7. Black race ^a	.06	.03	-.11*	-.28*	-.16*	-.50*				
8. Relationship status	-.08*	-.05	.10*	.31*	.17*	.15*	-.34*			
9. Breastfeeding	.01	-.01	-.01	.24*	.11*	.10*	-.25*	.08*		
10. Medication	-.03	-.07†	.04	.11*	.04	-.18*	.00	.03	-.03	
11. Allostatic load	.11*	.10*	-.13*	-.08*	-.12*	.01	.19*	-.12*	-.21*	.09*

Note: $N = 698$; Correlations were run using transformed variables. ^a Effects coded with White as the reference group.

* $p < .05$, † $p < .10$
