

# Identification of extrinsic cues promoting target-selective axon regeneration: How do regrowing axons know *where* to grow?

Lauren Walker, Camilo Guevara, & Michael Granato

Department of Cellular and Developmental Biology  
University of Pennsylvania

## Featuring:

Larval zebrafish!  
Pectoral fins!  
Robust, specific, and functional axon regeneration!  
Live imaging!  
RNA sequencing!

Want to walk through my poster,  
ask questions, or collaborate? My  
Q/A is **Thursday, April 30 12-12:30**

or email me to meet virtually:
