

Census 2020: Nathalie P. Voorhees Center for Neighborhood and Community Improvement

[census tools](#) [how to do it](#) [outreach tools](#)

Census 2020 website from the Nathalie P. Voorhees Center for Neighborhood and Community Improvement at UIC.

The site includes an FAQ page, a resource section with toolkits for outreach to hard-to-count populations and universities, and a listing of census events at UIC.

Differences between Census Bureau's ROAM and UDVL's MTC applications

[census tools](#) [RIs](#) [Subs](#)

Census response behavior is very sensitive to differences within and between states' geographic, socioeconomic and demographic groups. The major limitation of ROAM is one model for the entire United States, not accounting for such differences. Our MTC application addresses this issues. The resource here explains the differences and results in-detail.

Census Bureau's ROAM application

[census tools](#)

Response Outreach Area Mapper application developed by the Census Bureau to help identify hard-to-count (HTC) communities. We recommend using the HTC estimates found under the "maps" tab of the website instead of ROAM, since the maps created by the UIC team take into account regional and demographic differences across the state.
