

LEGEND

-  Contact between top of Cody Shale and base of Mesaverde Formation; pattern shown on Cody side of contact; "X" designates location of control point from outcrop; dashed where inferred
  -  Structure contour on top of Cody Shale; elevation in thousands of feet relative to sea level; dashed where inferred
  -  Structural depression
  -  Fault displacing Cody Shale; dashed where inferred
  -  Thrust fault displacing Cody Shale; sawteeth on upper plate; dashed where inferred
  -  Drill hole and data point
- Contour interval=1,000 feet
