

Smart Charging Green Electric Vehicle December 2020 v2

Terms & Conditions

1. Supplies of mains gas and electricity, or electricity only, from ScottishPower under the Smart Charging Green Electric Vehicle December 2020 v2 tariff ('Tariff') will be available until the date when the Tariff is withdrawn by us. All applicants must be aged 16 years or over and must contract to pay, and continue to pay, for the energy supply under the Tariff by monthly Direct Debit, have a single, two or multi rate meter and manage their account online. The Tariff is also available as a single rate version for customers with a multi rate electricity meter.
2. ScottishPower guarantees that the Tariff prices will remain fixed until 31st December 2020 ('End Date'), unless it is prevented from doing so by the actions or requirements of any governmental, statutory or licensing authority.
3. This Tariff is only available to customers who purchase the ScottishPower Smart EV Charge Point ('Charger') at the same time as choosing this Tariff. Full details of the Charger are provided separately at www.scottishpower.co.uk/electricvehicleterms. If at any point you cancel your purchase or installation of the Charger after choosing this Tariff, we shall be entitled to transfer you onto our Smart Green Electric Vehicle December 2020 v2 tariff, which is equivalent to an increase of 4.11p in your electricity supply's Daily Standing Charge unless you cancel your supply application within 14 days from receipt of your tariff confirmation letter ('the Cooling-Off Period'). We shall also be entitled to transfer you on to our Smart Green Electric Vehicle December 2020 v2 tariff if you do not have the Charger installed within 12 weeks of your supply start date, unless the conditions outlined in clause 4 apply. If this happens, we'll let you know in advance of changing your tariff, and tell you the impact to you and your options.
4. If at any point you cancel your purchase or installation of the Charger we shall be entitled to transfer you onto our Smart Green Electric Vehicle December 2020 v2 tariff, which is equivalent to an increase of 4.11p in your electricity supply's Daily Standing Charge. This will not apply if you cancel your supply application during the Cooling-Off Period.
5. The supply address of the property being supplied on this Tariff must match the installation address of the Charger. If you leave the property where your Charger has been installed prior to the End Date of the Tariff, the conditions outlined in clause 11 will apply.
6. Ofgem issue a Renewable Energy Guarantee of Origin (REGO) certificate for every MWh of eligible renewable output to generators of renewable electricity in the UK. REGOs demonstrate that a given share of energy was produced from renewable sources. ScottishPower provides Ofgem with output submissions on a monthly basis based on production from our own renewable generation portfolio. ScottishPower has an installed capacity to generate over 2000MW of renewable energy per year. For every MWh of electricity purchased on this tariff, ScottishPower will allocate a REGO certificate. For more information on the environmental impact of your electricity supply, visit www.scottishpower.co.uk/fuelmix. More information on renewable energy sources can be found at www.scottishpower.co.uk/renewables.
7. ScottishPower will write to you before the end of the Tariff to let you know what will happen next. Unless you choose another option, we will move you to another tariff on the same payment method and will provide further details of this tariff and the impact to you in this communication. At the end of the Tariff you will also have the option to cancel your contract with ScottishPower without being required to pay exit fees.
8. The prices you pay on this Tariff will replace any mains gas and electricity, or electricity only, prices which you may currently pay. The prices you pay on this Tariff can be reviewed in the "Your tariff information" section of your tariff confirmation letter and on our website, under Tariff Information Label.
9. By signing up to this Tariff you are registering your interest in getting a smart meter. This means ScottishPower, or an installer working on ScottishPower's behalf, may contact you in the future to discuss a smart meter installation as and when you become eligible.
10. The obligations on ScottishPower as your energy supplier will not come into effect until we have been registered as the supplier of mains gas and/or electricity to the property.
11. If you leave the property to which this Tariff applies, you will not be able to transfer this current Tariff to another property. However, you will be entitled to apply for any version of this Tariff that is available when you move property provided you still meet the eligibility criteria. Your rights relating to the Charger are provided separately at www.scottishpower.co.uk/electricvehicleterms.
12. Any quote given to you for this Tariff is based on the information you have provided to us.

13. If you fail to make a payment to ScottishPower under your payment method when it is due, we shall be entitled to transfer you onto our Standard tariff prices and change your payment method to an appropriate cash payment method. To consider the impact on your prices and terms and conditions should this occur, please go to www.scottishpower.co.uk. We will notify you of any changes to your payment method and prices should this be necessary.
14. These terms and conditions are in addition to the ScottishPower Gas and Electricity General Terms and Conditions for Domestic Customers, which can be accessed at www.scottishpower.co.uk/legal/terms-and-conditions/ and the Charger Terms and Conditions which can be accessed at www.scottishpower.co.uk/electricvehicleterms.

Quote and Comparison Information

If you're currently on a fixed term tariff that's due to end in the next 12 months, we've used your current prices and the prices you would most likely be transferred onto when your current tariff ends to provide you with a comparison.
