

Super Saver November 2020

B9

Terms & Conditions

SCOTTISHPOWER

1. Supplies of mains gas and/or electricity from ScottishPower under the Super Saver November 2020 B9 ('Tariff') will be available until the date when the Tariff is withdrawn by us. All applicants must be aged 16 years or over and must contract to pay, and continue to pay, for the energy supply under the Tariff by monthly Direct Debit, quarterly Direct Debit, Monthly Bill or online Debit Card, have a single, two rate or multi rate credit electricity meter and manage their account online.
2. This Tariff is only available through selected price comparison websites to new and existing ScottishPower customers.
3. By signing up to this Tariff, you are agreeing to have a smart meter installed in your property by ScottishPower, unless you already have one. This means ScottishPower, or an installer working on ScottishPower's behalf, will contact you to discuss the installation of a smart meter in your property. If you do not have a smart meter installed in your property within 3 months from; (1) the date you sign up to the Tariff, or (2) the date ScottishPower become the registered supplier for the property on the Tariff, then we shall transfer you on to our Standard tariff under the same payment method. To see how this could affect you, please visit www.scottishpower.co.uk and review our current Standard Domestic Prices in the Gas and Electricity Tariffs section. If we cannot install a smart meter for reasons outside of your control, you will be able to remain on this Tariff until the end of the Tariff term. We will notify you of any changes to your payment method and prices should this be necessary.
4. ScottishPower guarantees that the Tariff prices will remain fixed until 30th November 2020 ('End Date'), unless it is prevented from doing so by the actions or requirements of any governmental, statutory or licensing authority.
5. Ofgem issue a Renewable Energy Guarantee of Origin (REGO) certificate for every MWh of eligible renewable output to generators of renewable electricity in the UK. REGOs demonstrate that a given share of energy was produced from renewable sources. We'll match every MWh of electricity purchased on this tariff with a UK-sourced REGO certificate. Each REGO certificate shall be attributable to existing UK based renewable assets, including ScottishPower's own installed capacity to generate over 2000MW of renewable energy per year. Based on the national average fuel mix for 2018-19, a UK consumer with medium typical domestic annual consumption of 3,100kWh of electricity will produce CO2 emissions totalling 648kg. As we will match your consumption with a UK-sourced REGO certificate, the annual CO2 emissions under your tariff for electricity will be ZERO. You can access more information on [government support for renewable supply](#), [how electricity is physically distributed](#), and [ScottishPower's fuel mix](#).
6. If you cancel your Tariff by switching to another energy supplier, with the transfer fully completing more than 49 days before the End Date, we will apply exit fees. The current exit fees are £30.00 per fuel. These exit fees will be amended if there is a change in the VAT treatment, or rate, at any time or times more than 49 days before the End Date by an amount equivalent to the applicable change in the VAT treatment or rate. These exit fees will not be applied if at any point the agreement is cancelled due to a home move or, you move to an alternative ScottishPower tariff.
7. ScottishPower will write to you before the end of the Tariff to let you know what will happen next. Unless you choose another option, we will move you to another tariff on the same payment method and will provide further details of this tariff and the impact to you in this communication. At the end of the Tariff you will also have the option to cancel your contract with ScottishPower without being required to pay exit fees.
8. The prices you pay under this Tariff will replace any mains gas and/or electricity prices which you may currently pay. These prices can be reviewed in the "Your tariff information" section of your tariff confirmation letter and on our website, under Tariff Information Label.
9. The obligations on ScottishPower under the Tariff and these terms and conditions will not come into effect until we have been registered as the supplier of mains gas and/or electricity to the property.
10. If you leave the property to which this Tariff applies, you will not be able to transfer this current Tariff to another property. However, you will be entitled to apply for any version of this Tariff that is available when you move property.
11. Any quote given to you for the Tariff is based on the information you have provided to us. If we become aware this is not accurate, we will advise you of the correct prices in writing.
12. If you pay by Monthly Direct Debit and fail to make a payment to ScottishPower under this payment method when it is due, we shall be entitled to transfer you to an appropriate cash payment method on this tariff. This will increase your unit rates by 1.103p per kWh for electricity and 0.393p per kWh for gas (both inclusive of VAT). If you have more than one unit rate for electricity, each unit rate will increase by the same amount. If you pay by another payment method and fail to make a payment to ScottishPower under your payment method when it is due, we shall be entitled to transfer you to an appropriate cash payment method on our Standard tariff. To see how this could affect you, please visit

www.scottishpower.co.uk and review our current Standard Domestic Prices in the Gas and Electricity Tariffs section. We will notify you of any changes to your payment method and prices should this be necessary.

13. These terms and conditions are in addition to the ScottishPower Gas and Electricity General Terms and Conditions for Domestic Customers, which can be accessed at www.scottishpower.co.uk/legal/terms-and-conditions/.

Quote and Comparison Information

If you're currently on a fixed term tariff that's due to end in the next 12 months, we've used your current prices and the prices you would most likely be transferred onto when your current tariff ends to provide you with a comparison.
