

About your tariff

Cap Tracker Plus Sep27 v1 ends on 30 September 2027

You'll pay a daily standing charge and unit rate for each fuel on this tariff. We'll also add VAT at the applicable rate. If you have a multiple rate electricity meter, you may have more than one unit rate. For more details about the rates we charge go to www.britishgas.co.uk/alltariffs

The cost of each fuel on this tariff will be at least £25 cheaper per fuel type for the duration of the tariff compared to if the price was based on the maximum charge of the Ofgem default tariff price cap for the duration of the tariff. In these terms, the maximum charge means the highest amount Ofgem states we can charge customers for each unit of energy and standing charge if those customers are on default tariffs and not on prepayment meters. Ofgem provide this information on their website. In these terms, we call the Ofgem default tariff price cap "the price cap". The prices we charge depend on how you pay. But, no matter how you pay (your payment method) and which region you're in we'll still ensure for each fuel on this tariff your costs will be cheaper by at least £25 per fuel type compared to if the price was based on the maximum charge of the price cap.

We'll review the price for each fuel on this tariff each time Ofgem announce the maximum charge for the price cap (this is usually every 3 months) which means your prices may go up or down. We'll tell you if there is an increase to your prices whilst on this tariff.

When you switch to this tariff, the tariff details, such as your prices, any exit fees and when your contract starts and ends (the 'contract end date'), will be sent by email or post and will be in your online account at www.britishgas.co.uk.

Price reviews and how we tell you when there is a price increase

Your prices will be reviewed every three months after Ofgem announce the latest price cap.

If there is a change to the maximum charge, your prices will be updated on the following dates: 1 October 2026, 1 January 2027, 1 April 2027 with the last price change on the 1 July 2027. If your prices are increasing, we'll give you reasonable notice before changing the price. We'll let you know what prices (unit rates and/or standing charges) are changing and confirm when the new prices will apply.

When we won't change your price

Although this is unlikely to happen, if for some reason Ofgem or the government do not announce a change to the maximum charge, the prices for this tariff won't be reviewed until the next maximum charge is announced. If your prices stay the same, or if there is a decrease in your price, we will not contact you.

If Ofgem or the government stop or change how the price cap works

If the price cap is removed or significantly changes before the end date of this tariff because of something Ofgem or the government decide, we'll contact you. If the price cap has been removed, your prices will track at least £10 per fuel below our Standard Variable tariff for the remaining duration of this tariff. This means that if our Standard Variable tariff prices change, this tariff will track below the latest Standard Variable tariff prices. Before we increase your price, we will give you reasonable notice. If we decrease the price of this tariff we will update our website. Our Standard Variable tariff prices could go up or down, but this tariff will always be cheaper. You can switch to another tariff at any time.

Manage your account online

You can manage this tariff and your account online. Managing your account online means:

- your bills and statements will be available online and not posted to you
- you can check your account details on our website, www.britishgas.co.uk
- you can find information about your tariff and account on our website
- you'll provide your meter readings online once a month (if you don't have smart meter(s) which if communicating, send us meter readings automatically)
- you can contact us using our web chat service.

Your bills and statements will be available on our website at www.britishgas.co.uk

We'll send you emails when your bills and statements are ready and prompt you for meter readings. You should provide meter readings for your fuel(s) when we prompt you for them to help ensure your bills are up to date. This is in addition to the requirement in the supply terms to provide meter readings at least twice a year. If you are not able to send us meter readings when prompted, we'll provide estimated bills. We'll automatically take meter readings if you have smart meter(s) which can send the meter readings directly to us.

Paying for your energy

Your prices may change depending on how you pay. If you pay by Direct Debit but miss any payments we can ask you to pay by bank transfer or by card payment and your prices would go up – we'll explain the difference when we contact you and you can find the details at www.britishgas.co.uk/energy/terms. We'll contact you at least seven working days before changing how you pay.

If you have prepayment meters or your meter has previously been mode changed to prepayment, or you request either of these outcomes

If you have an existing prepayment meter, or you request a prepayment meter, or your meter has been mode changed to prepayment previously, we'll switch your tariff for each fuel on prepayment to our cheapest default tariff with no end date which is available to prepayment meter customers at that time. For any fuel which is not on prepayment these existing terms will apply. We'll let you know if your tariff has changed because you have a prepayment meter.

If you want to cancel or switch your tariff

You have 14 days from the day after you agreed to this tariff to change or cancel your tariff without paying exit fees. This is your cool off period. For more information go to www.britishgas.co.uk/cooloff. If you agree to a supply start date during your cool off period and then cancel before cool off ends, you will have to pay us for any energy you use (and standing charge due) before your cancellation takes effect.

If you move to another fixed tariff with us, there are no exit fees.

If you switch to a British Gas tariff with no fixed end date e.g. Standard Variable, after the 14 day cool off period and before the last 49 days of your contract we'll charge you an exit fee for electricity and gas.

You can switch to another supplier without giving us any notice. If you switch to another energy supplier after the 14-day period and before the last 49 days of your contract, we'll charge you an exit fee for electricity and gas. We'll collect exit fees before any other amounts you owe us, either from payments you make or from any credit balance you have with us.

You can check if your tariff has exit fees and the amount in your tariff details or on your online account at www.britishgas.co.uk.

At the end of your contract

We'll contact you at a reasonable time before your contract end date so you can consider your switching options. If you don't switch tariff or supplier before your contract end date we'll move you to the cheapest default tariff (no exit fees) we have available to you at that time.

From the last 49 days before your contract end date if you decide to switch, you'll keep your current prices and terms and conditions until:

- You switch to one of our other tariffs (if available) no later than 20 working days after (but not including) your contract end date; or
- You switch to another supplier, and they tell us you'd like to switch no later than 20 working days after (but not including) your contract end date. The other supplier then needs to supply your energy within a reasonable time after they told us you want to switch. If you try to switch supplier and we tell you we object to the switch, you'll need to pay any outstanding supply charges for the fuel(s) you want to switch within 30 working days after we tell you we object, and the other supplier must also start to supply your energy within a reasonable time after you told us you want to switch.

General

We'll only sell so many of these tariffs, and we might withdraw it.

Our terms and conditions of supply also apply. You can find them at www.britishgas.co.uk/energy/terms. If there is any difference between what we say in these terms and conditions and the supply terms, what we say in these terms takes priority.
