

Business model

Our goals are achieved through a clear, long-term strategy and an established, stable business model.

Value creation

¹Successful returns

The success of Mobimo's returns can be attributed to stable and growing rental income, return on equity, yield from investment properties and low vacancy rates.

²Capital gains

Capital gains are generated by profits on trading properties and development services, as well as the successful sale of investment properties.

³Appreciation in value

Portfolio management and the execution of construction work help increase the portfolio's overall value. High customer satisfaction and income from revaluations also help it appreciate in value.

Portfolio
