

Business model

Our goals are achieved through a clear, long-term strategy and an established, stable business model.

Value creation

¹Successful returns

The success of Mobimo's returns can be attributed to stable and growing rental income, return on equity, yield from investment properties and low vacancy rates.

²Capital gains

Capital gains are generated by profits on trading properties and development services, as well as the successful sale of investment properties.

³Appreciation in value

Portfolio management and the execution of construction work help increase the portfolio's overall value. High customer satisfaction and income from revaluations also help it appreciate in value.
