

AirSeal® Robotic Solution

The superior insufflation system for stable pneumoperitoneum, enabling surgeons to confidently operate at lower intra-abdominal pressure.

Seamlessly integrated with the *da Vinci surgical system**

* Compatible with the Intuitive da Vinci Xi and da Vinci X systems

AirSeal® provides unparalleled benefits for MIS, from standard Laparoscopy to the most advanced Robotic procedures:

- Stable Pneumoperitoneum for consistent exposure even during suction and leaks
- Enables surgeons to operate at Low Intra-Abdominal Pressure
- Constant Smoke Evacuation to ensure visibility throughout the procedure
- Valveless Access to the surgical site avoids fragmentation during specimen removal

Get the performance of AirSeal® streamlined into your da Vinci procedure workflow, without the need for an assist port.

➤ ***Contact your local CONMED Sales Representative to start using AirSeal® today!***
