

TRBOnet Enterprise | Plus

Integrated IP-based dispatch systems

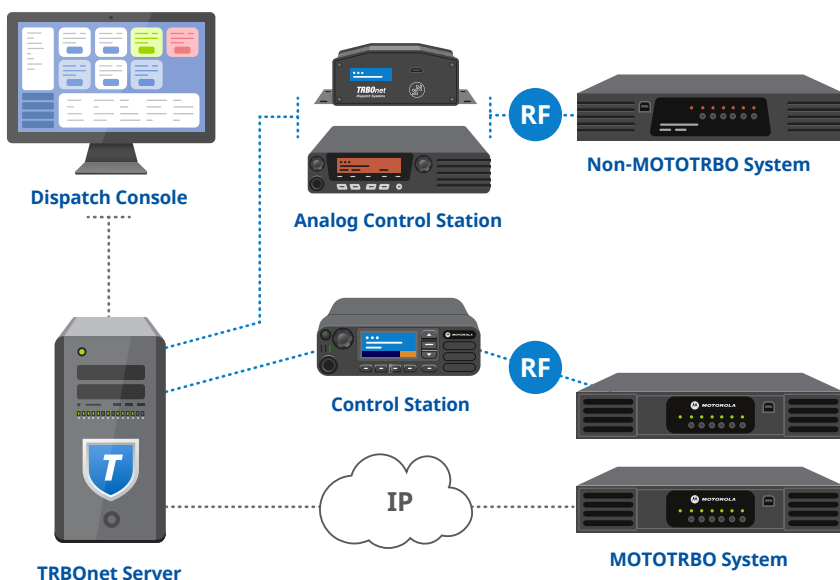

September 2024

Make the most of your radio network

TRBOnet Enterprise is an IP-based dispatch application with capabilities far beyond just mere dispatch functions and features. This powerful solution enables a user to fully control and manage all available resources. You can choose between our renowned Classic console or TRBOnet One, an enhanced dispatch solution with unrivalled flexibility.

TRBOnet System Design

TRBONET ONE

TRBOnet One is an advanced console solution for **TRBOnet Enterprise** and **TRBOnet PLUS**. Its unique, configurable interface allows administrators to design a console tailored to focus on essential tasks for dispatchers.

With TRBOnet One, you can create multiple sophisticated layouts by combining various modules, which adapt to any screen aspect ratio and resolution. Compared to the classic console, TRBOnet One offers faster performance and is less resource-intensive.

TRBOnet One supports most features available in the classic console while also boasting some unique capabilities.

- + Flexible graphical user interface
- + Telemetry Dashboard, support for MODBUS
- + Indoor Location, support for 3D floor plans
- + Messages and file transfer
- + A notification system with configurable severity levels
- + PDF Viewer
- + Quick Commands
- + Hot keys
