

VIDEOMANAGER ON-PREMISES DEVICE LICENCE OFFERINGS

DEVICE LICENCE

VM-EPL-VB-1-N

This licence is required in order to use your VB-series camera with VideoManager. It also enables the following functionality:

FEATURES	
BODY-WORN CAMERA MANAGEMENT	<p>Administer your suite of body-worn cameras from VideoManager. This includes assigning devices to ensure that all recorded footage can be traced back to a specific user, and upgrading devices to the most recent firmware.</p> <p>Customise a wide range of recording behaviour including recording alerts, video resolution and GPS.</p>
USER MANAGEMENT	<p>Manage and streamline your workers' access to VideoManager using granular permissions, groups, and roles.</p> <p>Meet your organisation's security policies with comprehensive password policies, automatic account locking after incorrect password entries and two-factor authentication.</p>
INCIDENTS	<p>Group footage from body-worn cameras and other imported media into evidence bundles. Enables you to clip and redact videos in line with evidentiary requirements, and then share or export.</p>
MEDIA IMPORT	<p>This enables one user per device licence to import external media - including PDF, MP4, JPG, and PNG - into VideoManager. You can then process, redact, and handle this media in the same manner as body-worn video.</p>
MEDIA PROPERTIES	<p>Meet your organisation's media categorisation requirements with VideoManager's powerful custom fields (including dropdowns, checkboxes, and date/time fields).</p>
STREAMING	<p>Stream live footage from your body-worn cameras back to VideoManager, over Wi-Fi.</p>
ONSTREAM	<p>Use VideoManager to serve live-streams and recordings from your body-worn cameras back to an ONVIF-compatible Video Management System (VMS). This enables you to view - and record - footage in a third-party VMS.</p>
REPORTS	<p>Collate information about high-level system parameters - such as user behaviour, camera field trips and equipment availability - into one downloadable CSV file.</p>
USER INTERFACE CUSTOMISATION	<p>Integrate VideoManager into your organisation's brand identity with a configurable colour scheme, logo and default language.</p>

HQ BASE

VM-EPL-HQ-BASE

This licence enables more powerful VideoManager features, in addition to the functionality provided by your VB-series camera licence.

FEATURES	
CENTRAL VIDEOMANAGER	Enables hierarchical architecture with oversight over multiple installations: one instance of VideoManager acts as a Central VideoManager (which controls licensing, configuration and metadata) while other instances connect to it as sites.
IDENTITY MANAGEMENT	Export a VideoManager user list with one click, then easily modify and re-import, or quickly migrate to another instance.
USER IMPORT TOOL	Automatically sync your existing user database with VideoManager to easily manage joiners and leavers and ensure up-to-date user permissions. Compatible with multiple sources, including Azure AD™.
COMPOSITE CLIPS	Compile multiple, parallel viewpoints of an event into one video within an incident, then watch the clips back simultaneously.
VB SMARTCONTROL (COMING SOON)	Watch and categorise VB400 footage securely while still in the field using the VB SmartControl Android and iOS app. Once your VB400 is redocked, all footage is automatically offloaded to VideoManager.
ANTIVIRUS INTEGRATION	Scan imported media for viruses in conjunction with a customer-provided OPSWAT™ service.
MEDIA PREPARATIONS	Redact and annotate media without adding it to an incident. This includes blurring, pixelation, zooming, transcribing and cropping.

ADDITIONAL LICENCES

These licences ensure that your additional requirements are fully met

PART CODE	DESCRIPTION
VM-EPL-3PVMS	Enables VideoManager integration with third-party VMSs. Required for every site which will be passing streams to a third-party VMS. Not required for integration with ONVIF-compliant VMSs.
VM-EPL-STORE-1TB	Use VideoManager with customer-provided Amazon S3™ or Microsoft Azure Blob™ storage. Required for each TB of storage.

SOFTWARE ASSURANCE

By default, every VideoManager licence comes with 12 months of Software Assurance - this grants you access to phone/email support and VideoManager releases within that period. You can also extend the period of cover by adding extra Software Assurance to your licence, ensuring your organisation always has the most up-to-date software with the newest features.

PART CODE	DESCRIPTION
VM-ESA-VB-12M-1	Extra 12 months of Software Assurance for a VideoManager installation with a VB-series licence.
VM-ESA-VB-24M-1	Extra 24 months of Software Assurance for a VideoManager installation with a VB-series licence.
VM-ESA-VB-48M-1	Extra 48 months of Software Assurance for a VideoManager installation with a VB-series licence.
VM-ESA-HQ-BASE-12M	Extra 12 months of Software Assurance for a VideoManager installation with an HQ BASE licence.
