

# KAPTECH

## COMPOSITE HOSE ASSEMBLIES

- Widely used for bulk transfer of various chemicals, fuels, industrial fluids etc.
- Lightweight with good flexibility, easy to handle and install.
- Sizes from 1" nb through to 10" nb dependent on specification.
- Max. working pressure dependent on size, specification and application/working conditions.
- Constructed of multi-layer films and fabrics supported by inner and outer wire helices. Materials selected according to specification and application details.

- Wide range of end fittings available including lug nuts, cam-locking couplings, BSP/NPT threads, flanges etc. End fitting materials include brass/gunmetal, steel and stainless steel.
- Assemblies can be supplied with various self-sealing and minimal-spill quick-release couplings.
- For specific applications and working conditions, please consult Guyson Technical Sales Department.
