BLAST MEDIA DATA SHEET

GUYSON CERAMIC BEAD

for use with compressed air blast systems – dry, wet and turbine wheel

GENERAL

Guyson ceramic beads are a high quality zirconia based blast medium with a very slow breakdown rate and as such are ideal for impact finishing operations involving both manual and automated machinery, where consistency of finish is important. Additionally, dust levels generated are considerably lower than with the equivalent glass bead.

The standard product (B grade) is available in a range of different bead sizes and these are ideal for many blast processes such as surface cleaning, deburring, cosmetically enhancing etc. Also available is a higher quality product (Z grade) where checks to roundness, surface defects etc allows the bead to be certified to the demanding standards of aerospace and automotive shot peening applications.

Sizes Availa	able:	Nominal Size Range (microns)	Sizes Avail	able:	Nominal Size Range (microns)
B20	:	600 – 850	Z210	:	210 - 300
B30	:	425 – 600	Z300	:	300 – 425
B40	:	250 – 425	Z425	:	425 – 600
B60	:	125 – 250			
B120	:	70 – 125	Pack Size	:	25 kg
B125	:	0 – 125			G
B205	:	0 – 70			
Pack Size	:	25 kg			Ceramic bead and shot are non-toxic and non-hazardous products that contain no free silica. No special

disposal precautions are required for the products once they have been used for blast finishing purposes. However, contamination from a specific application or process must

also be considered prior to disposal
