

GALLERY WRAPPED CANVAS

The gallery wrap option for a photograph will give a stylish modern look and calm atmosphere in your own home. A professional photo on traditional canvas combines a warm look with simple elegance. With its unique matte or glossy surface texture, canvas gives your picture a lively, tactile materiality full of detail and brilliant colour.

The superior quality Artist Canvas is wrapped around the edges of a wooden stretcher frame to give the image depth and dimension. It is without wedges, meaning that tightening or loosening it later is completely unnecessary. This versatile display option will compliment any space or decor both in the home or in the office.

Thanks to the 8-colour Epson pigment printing process, the surface is resistant to small splashes of water, and colour pictures are intensely luminous. The print extends around the edges of the stretcher frame, ensuring your picture makes a great impression from any viewing angle.

The characteristic texture of canvas brings out an entirely different effect than the perfectly smooth surfaces of modern substrates. Your photo benefits from the tactile, three-dimensional appearance of the material - the production process is practically visible in each individual fiber.

Even the Old Masters knew to use canvas for their pictures.

All photographs are signed. Printing and production is by an industry-leading photo lab company with worldwide production facilities. Gallery wrapped canvasses are securely protected in high quality, robust packaging for shipping.
