Interview

Helen Steer

64 Why 'maker movement' is a buzzword (and that's fine)

Direct from Shenzhen

Microscope

116 Make tiny things appear bigger with the magic of optics

77 FORGE

- 78 SoM Arduino**
Temperature and humidity sensors the lazy way
- 84 SoM Homebrew computing**
Only the elite keep their breadboards this tidy
- 90 SoM Laser-cut gears**
Build a turntable with lasers and mathematics
- 96 Tutorial ESP32**
Get more bang for your buck with this baby board
- 100 Tutorial PCB etching**
Build your own PCB factory
- 106 Tutorial Spherification**
Take your gastronomy to molecular levels
- 110 Tutorial Electroluminescence**
Decorate the shed with an EL wire sign

115 FIELD TEST

- 116 Direct from Shenzhen Microscope**
Augment your puny human eyes with superpowers on the cheap
- 118 Best of Breed**
The best tools for removing broken screws
- 122 Can I Hack It?**
Make the robots welcome their new human overlords!
- 124 Review NFC nail stickers**
Discover near-field communication literally at your fingertips
- 126 Review BeoCreate audio board**
Bring high-end audio speakers into the digital world
- 128 Review Marty the robot**
A low-cost programmable robot for kids and teachers
- 129 Book Review When Thea LED the Way**
Inspirational illustrated tales of engineering

Some of the tools and techniques shown in HackSpace Magazine are dangerous unless used with skill, experience and appropriate personal protection equipment. While we attempt to guide the reader, ultimately you are responsible for your own safety and understanding the limits of yourself and your equipment. HackSpace Magazine is intended for an adult audience and some projects may be dangerous for children. Raspberry Pi (Trading) Ltd does not accept responsibility for any injuries, damage to equipment, or costs incurred from projects, tutorials or suggestions in HackSpace Magazine. Laws and regulations covering many of the topics in HackSpace Magazine are different between countries, and are always subject to change. You are responsible for understanding the requirements in your jurisdiction and ensuring that you comply with them. Some manufacturers place limits on the use of their hardware which some projects or suggestions in HackSpace Magazine may go beyond. It is your responsibility to understand the manufacturer's limits.
