

When I go fishing By Carson

When I go fishing I alot of times catch a Bass. The line breaks alot but I fix it. What I do first is I catch a perch and make sure it is hooked good, then I cast my line out and wait. And about 30 minuits you catch a big bass. Or a cattish. Onece a big cattish pulled my pole in the water and I jumped in the pond after it. The pond water tastes horrible. But after -

wards I got my pole back, but no fish. I was all wet. So I ran home and changed clothes, and then ran right back. My parents never knew.
