

November 11, 2016

The slides housed here (both PPT and PDF format) provide all of the screenshot figures in Chapters 4, 5, 6, 7, 9, 10, 11, 12, and 13 as well as the pivot table tutorial screen shots of Chapter 14. The slides are designed to be used in conjunction with the tutorials and demonstrations in the text. The slides allow you to see what should be displayed on your screen as you work through the tutorials and demonstrations. This is especially helpful in situations where the figures in the book are difficult to examine in detail.

Slides are revised as necessary to reflect updates to the software (Weka and RapidMiner) that directly affect the text. Any needed changes to the tutorials in the text resulting from software updates are clearly stated in the *Errata* file. Please email any questions or concerns to richard.roiger@mnsu.edu.
