

# Student safety at our colleges

Your health and wellbeing is our top priority. We want you to feel safe and secure when you join us in the UK, which is why we've put a range of safety measures in place at our colleges. We're doing everything we can to protect you and your classmates, so that you can study with confidence.

### Hand sanitiser stations throughout the building

Personal hygiene is key to keeping our colleges safe, and it's important that everyone plays their part.

### Floor markings to aid social distancing

Social distancing reduces the risk of transmission. Our floor markings make it easier for you to keep your distance.

### Reduced classroom capacity to comply with guidelines

UK government guidelines recommend smaller class sizes to help avoid close contact with others.

### Directional signage to ensure a safe flow of traffic

To help guide you around the college safely, there are clear one-way systems and signage in place.

### Face masks available for anyone who needs one

Free face masks are available at your college in case you forget to bring yours with you.

### Thorough cleaning at frequent intervals every day

Rigorous cleaning is vital, and we are frequently and thoroughly cleaning our colleges every day.

### Fully briefed staff

All college staff are fully briefed on health and safety requirements, and they know what is needed to keep everyone in the building safe.

### Clear communication

Upon arrival, all students receive clear explanations and instructions about safety measures, so that you know how to stay safe and protect others.

### Blended learning

A mix of remote digital learning and in-college teaching means that your timetable can be carefully organised to limit any risk.

### Support services

It's not just your physical wellbeing that's important to us. Our College Services teams are there for you and can help with issues you may face.

# Student safety at our residences

## Secure transfers upon arrival

From the moment you arrive in the UK, your health and wellbeing comes first. We want to make sure that you feel comfortable and confident about your safety. That's why we're here to support you in arranging a secure transfer from the airport to your accommodation. We are ensuring that our vehicles and transfer drivers all comply with UK government guidelines on social distancing and hygiene — we're all working together to protect your wellbeing.

## Supportive staff and measures

Our residences are also implementing a number of health and safety measures so that you can live with confidence. These include hand sanitiser stations; frequent and thorough cleaning; extra cleaning procedures for high-traffic points; one-way systems; and floor markings and signage to facilitate social distancing. You'll also be provided with a free student starter pack, which contains a face mask and personal bottle of hand sanitiser.

## What happens if you need to self-isolate at our residences?

We're committed to keeping students supported and safe, with special extra measures in place to make any quarantine period as pleasant as possible.

### Accessing food and drink

Our residences are working on ways in which they can assist students with accessing food and drink if a quarantine period is required. While we won't be able to prepare meals, we could help you register for online food shopping, assist with deliveries and share details of local takeaway food providers.

### Using facilities and resources

If you have to self-isolate, you'll still have full use of your bedroom, private bathroom or studio flat (depending on your type of accommodation). You can join the online social activities during Welcome Week, start your studies via digital learning and join in-person at the College when you're able to.

Whatever the circumstances of your arrival in the UK, we'll be here to support you, so that you can study and live with confidence.
