MODULE SUMMARIES – DETAILS OF WHAT YOU’LL STUDY

**Computer Architecture**
The module will introduce the students to the structure and components of a computer system.

**Database Design and Implementation**
This module will introduce students to the required underpinning knowledge, and theories of database design.

**Digital Evidence**
The module will introduce the students to the knowledge required with regards to computer crime and digital evidence.

**English for Academic Purposes**
Develop your English to the level you need for university study, and to really get involved in academic discussions.

**Principles of Computing**
The module introduces the concepts and principles behind hardware and software systems.

**Programming C/C+**
This module introduces the skills required to develop a computer program using C/C+ to solve a given problem.

**Web Programming**
This module provides the basic principles required for the creation and maintenance of a database driven web application.

EXTRA MODULES FOR 2.5 AND 3-TERM COURSES

**Critical Reading, Writing and Reasoning for Higher Education**
Enhance your ability to read and understand complex ideas in English, and to compose convincing written arguments.

**English for Academic Study 3**
Expand your knowledge of English grammar and vocabulary to the level required for degree study.

**Independent and Collaborative Study**
Work individually and in teams on an academic task, and practise applying your subject knowledge and study skills.

**Preparatory Mathematics**
Develop your numeracy skills, including algebra, geometry and graphs.

**Preparatory Science**
Gain an introduction to core scientific knowledge, and subject-specific language required to study the sciences.

**Reading and Writing 3**
Develop your English reading and writing skills to a sufficient level to communicate complex ideas.

**Speaking and Listening 3**
Improve your ability to listen and speak in English, allowing you to fully engage with academic topics.

EXTRA MODULES FOR 3.5 AND 4-TERM COURSES

**English for Academic Study 2**
Improve your English grammar and vocabulary in order to communicate in an academic environment.

**Reading and Writing 2**
Develop your English reading and writing so that you can understand and articulate ideas and reasoning.

**Speaking and Listening 2**
Practise listening and speaking so that you are better prepared for academic debate and discussion.

**Study Skills Preparation**
Gain an introduction to the wide range of skills and strategies you'll need to succeed at university, such as research methods and using and citing sources.
PERSONAL DEVELOPMENT ACTIVITIES (ALL COURSE LENGTHS)

Digital and employability skills
Outside of your academic learning, you’ll also be taught skills that will be useful at university and later in life. You will receive help in making the most of your creativity, improving your communication and developing your digital skills. We will also help you build a CV, portfolio and online profile to empower you after you graduate.

Social network
Forming a strong social network can be hugely beneficial, even if it’s just to discuss and debate ideas. Not only will you get to know your classmates, you’ll also have opportunities to join professional organisations, and network with students and industry professionals: something that can be really beneficial when you go on to start your career.

Culture and activities
We’ll help you have a hugely beneficial cultural and social experience, and encourage you to explore different activities, sports, crafts and more. You might learn about local history and culture or develop your wider subject knowledge and understanding of related industries.

Note: this information refers to courses that will run in the 2019-20 academic year and is correct at the time of publication. Published March 2019.
