

HUMANITY ASCENDING (Ref. 062)

Our story is seen through evolutionary eyes as the unfoldment of a fourteen billion year journey of transformation, now pressing us forward to give birth within ourselves to a universal human and a universal humanity capable of co-evolving with nature and co-creating with spirit. This compelling vision of hope sees us at an evolutionary edge where the old world is dying and the new world is being born.

Our storyteller, Barbara Marx Hubbard, has been a leading light for innovative change in the world for the past 40 years. As a visionary, author, speaker, social architect and co-founder of the Foundation for Conscious Evolution, she posits that humanity now, as never before, is on the threshold of a quantum leap. If we are to integrate newly emergent scientific, social and spiritual capacities, we could transform ourselves to move beyond our current global crises to a magnificent future equal to our vast new potential.
