

A DVD Region Lock is technology on DVD players that prevents those who live in one part of the world from successfully viewing a DVD movie that was produced and distributed for a different part of the world. Although you could purchase a DVD movie in the UK and mail it to someone in New York ten months before the DVD is released there, the DVD will not play on the recipient's Region 1 DVD player.

Region 1 - United States and Canada

Region 2 - Japan, Europe, South Africa , Middle East, and Greenland

Region 3 - S. Korea, Taiwan , Hong Kong, and Parts of Asia

Region 4 - Australia , New Zealand , Latin America, and Mexico

Region 5 - Eastern Europe , Russia , India , Africa

Region 6 - China

Region 0 - This will work on all other regions; Region 0 DVDs can be played worldwide but are still subject to PAL discs and NTSC compatibility
