

HAPPENSTANCE (Ref. 251)

This lyrical French film starring Audrey Tatou surprises with its random coherence, telling a tale of six seemingly disconnected stories that are all somehow part of a whole. 'The butterfly effect' describes how the flutter of a butterfly's wings is enough to affect the course of events throughout the world, and this film shows how true that is. Watch as the story unfolds, revelling in the wonderfully random nature of life and the meaning that 'coincidentally' finds its way through.
