

Permissions

Planning

Up to 4 metres would be classed as permitted development. If the flagpole desired was higher than we would need to complete a pre-application enquiry online.

Landowner

NCC Highways would need the exact location of the flagpole before they could give permission and approve the types of flag to be flown.

Costs

The cost of a 4 metre heavy-duty aluminium flagpole ranges from £100 to £240, depending upon the halyard system, hinge and finial.

The cost of a 4 metre fibreglass flagpole ranges from £210 to £280, depending upon the halyard system, hinge and finial.

The cost of flags is around £50-£100.

I would expect installation to be no more than £120.

Location

The Glade would be the most obvious choice for a vertical ground anchored flag.

Other options could include a angled wall mounted flag flown from The Spetchells Centre.
