Post Installation Inspection														
Snagging														
Sign off completion														
Project progress meeting														
Project completion feedback meeting.														

Considerations

1. The lead in time is based upon the finalisation of equipment following 'sign off' with the community.
2. Should the equipment be finalised earlier the lead in time will be obviously be reduced.
3. There are contingencies built into the schedule i.e. 'a P.I.I will not a full week'.
4. **Please note that this schedule is only provisional. A specific one will be produced at the pre-contract meeting after the official order is placed.**
