

Repairs (see attached inventory sheet)

Motifs various sections @ £315.00 materials plus £295.00 labour, total £610.00

1 x 300mm dia. Sphere in white @ £63.00

10 x 10mtr strings of LED lights @ £27.50 each total £275.00

Total for repairs would be £948.00

NOTE if council decided not to include the ceiling of light in the Glade, these lights could be used to enhance the deciduous trees in that area and therefore would not require to purchase 10 x 10mtr strings as mentioned above thus saving £275.00

Should you require further information please do not hesitate to contact me, or I am happy to visit at your convenience and discuss options with you, for you to put to council.

RFO NOTE

Please note that the Christmas Lights budget does not include any allocation for repairs, but does include £600 for potential call out. Call-out could be taken from contingency if needed and repairs allocated to the Christmas Lights budget, with the remaining £215 taken from contingency.

Christmas Plus has also made some recommendations for improvements to the Christmas Lights displays, these are as follows:

Ceiling of light in the Glade

This has been vandalised twice in 2017/18 season and also was vandalised in 2016/17

Does council wish to include this in the display for 2018/19?

Deciduous Trees in the Glade

These are now in need of maintenance, to remove the lights test and report would have a cost of **£395.00. Following the report we can then advise as to how to proceed with costs for reinstall.**

Artificial Trees

The ones situated along Front St are now starting to look tired and could really do with a replacement programme. **Should you wish to follow or start such a programme we can supply 4ft artificial trees to you discounted @ 35.00 each. 24 x 3ft trees in stock now.**

Cross St Lighting along Front St

Should council wish to add new effects to this area we have a new product "Pulstars" which can be added to your existing harness (details from brochure attached, p29). **The size we recommend for this area come in sets of three at discounted price £65.00 per set. Total number of sets suggested for town centre would be 12 (total cost £780.00)**

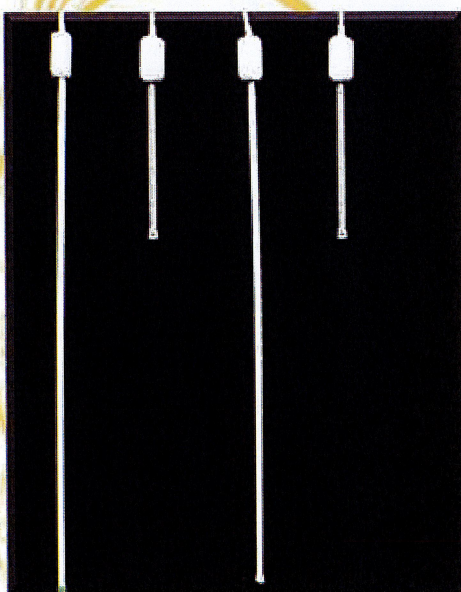

Santa motif

The column by the garage (now shop) has been removed; we suggest this motif could be recited on a suitable gable end? **This would not incur any additional costs, just let us know location and if required confirmation of permission to drill small ring bolts approx. 25mm dia. x 3 into building.**

RFO NOTE

As above there is no budget for additional lights, any agreed spending would need to come from the Contingency budget.

Pulstars and Snowfall Strips

Pulstars

Pulstars give an impression of an extremely bright pulsating star with the lighting chasing from the centre to the outer edges.

They are available in 240v with BC/B22 fitting, or 12v, 0.5m diameter or in a set of 3 x 0.2m diameter.

They have a multitude of uses and look particularly stunning in a well dressed Christmas Tree.

Pulstars are guaranteed for 2 years from D.O.P.

Conditions apply.

Snowfall Strips

Christmas Plus supply double sided animated Snowfall Strips manufactured to protect against all weather conditions.

These are available in 240v with BC/B22 fittings 1.0m, 0.5m and 0.3m drop.

The 12v version is connected by use of a harness and are available in 0.5m and 0.3m drop.

The Snowfall Strips can be added to your existing lighting to enhance the display by giving a bright light with a soft falling effect.

The Snowfall Strips are guaranteed for 2 years from D.O.P. Conditions apply.
