Hi

Please see attached a video of todays flooding on our caravan Park. Im glad we are not open yet as many of our access roads have been badly affected and water is under some of our static caravans.

High tides are predicted for March and this is a bit more of a worry for us as we open on the 27th March.

We need to come up with a feasible solution to address this issue and I don't think the solutions posed by the Highland council and nature scot are feasible. We are happy to make a contribution financially to help find a solution as it is affecting our business.
