

**Carol Robertson, MCIEEM,**  
MICFor

MSc Forestry & its relation to Land-use

BSc (Hons) Plant Science

Woodland adviser based in the North East,  
working throughout Scotland with focus on  
Grampian, the Central & Northern  
Highlands.

Carol has over the last 25 years been working with landowners and managers in woodland management & creation. Her particular experience is in native woods, riparian woodlands and Plantations on Ancient Woodland Sites (PAWS). She has developed a number of woodland plans and successfully secured forestry grant funding to support the agreed management recommendations, including on Designated Sites. Over the last six years she has undertaken an annual survey of the Pearl-bordered Fritillary butterfly at a NE site.

#### **Carol's Skills**

- Native woodland management & regeneration surveys
- Native woodland creation including community projects
- Grant applications & associated GIS mapping
- Assessment of remnant features on PAWS

#### **Other roles**

- Full member of Chartered Institute of Ecology and Environmental Management (MCIEEM 1999 onwards).
- Chartered Forester, The Institute of Chartered Foresters (MICFor 2002 onwards).
