

Lost Redesdale – Lidar Landscapes

Lidar Interpretation Workshop

Wednesday 17th October 7.00—9.00pm

Corsenside Parish Hall, West Woodburn, NE48 2SQ

What is Lidar?

How can it be used in archaeological research?

How can we use it to study the archaeology of Redesdale?

Lidar is an amazing new technique used in archaeological landscape survey. Join Paul Frodsham (ex Northumberland National Park Archaeologist) to find out how you can take part in an exciting new Lidar survey of Redesdale, with a real chance of making significant new discoveries, all from the comfort of your own home! This introductory workshop will include a training exercise using real Lidar data from Redesdale that has never been studied before – we might even find something on the night!

Places are limited so please book early to avoid disappointment. To book your place, please contact Karen Collins, Revitalising Redesdale Heritage and Engagement Officer

tel: 07741 194309, email: karen.collins@nnpa.org.uk

Suitable for ages 12+. Under 18's must be accompanied by an adult. Refreshments provided.
